ENJOY LIFE

THE SAPPHIRE POOLS DIFFERENCE

Congratulations - you have taken the first step towards enjoying many summers with your family in a Sapphire Pool!

Here at Sapphire Pools, creating happy family memories is our goal. Since 1970, we have provided swimming pools to thousands of WA homes with one mission in mind – bring fun-in-the-sun to WA families by offering the very best pools at the best price.

We offer an extensive range of 21 fibreglass swimming pool models to choose from, or if you prefer the versatility of a concrete pool, we can create a custom pool in any shape and size you desire.

So for the best pool from the best team, look no further than Sapphire Pools.

OUR COMMITMENT TO YOU

We are:

QUALIFIED

- ✓ Western Australian owned and operated since 1970
- ✓ Product Certified and licenced to build to Australian Standards 1838
- ✓ ISO 9001 accredited – pools built in compliance with a Quality Management System
- ✓ The largest swimming pool manufacturer in WA
- ✓ An onsite, qualified Industrial Chemist oversees product quality

Our pools are:

LASTING

- ✓ Made in Western Australia to suit local conditions

- ✓ Manufactured with full-sized ribs & full-size structural edge-beam, eliminating the need for sand and cement backfill or a concrete bond beam
- ✓ Manufactured with structurally supported seats, steps & swim-out areas for extra strength
- ✓ Made with all fittings fibreglassed to the shell for additional structural integrity
- ✓ Manufactured using Swimming Pool Grade Fibreglass & Resins - specifically for pools

GUARANTEED*

- ✓ All Pools include an Extended Lifetime Structural Warranty
- ✓ Lifetime Interior Surface Guarantee available with Pool ColourGuard™ - pool colour that will not fade

OPPHIRE POOL

AWARD WINNING POOLS

The proof of our commitment to quality is in the number of industry awards that we have received over the years. Our trophy cabinet includes many local awards from the Swimming Pool and Spa Association (SPASA) of Western Australia.

We are also proud to have received National SPASA Awards of Excellence and have even been awarded gold by the international Association of Pool and Spa Professionals (APSP).

Take a browse through our trophy cabinet and you will notice the following logos in recognition of our dedication to building the very best swimming pools available.

Association of Pool & Spa Professionals (APSP) International Awards of Excellence

The APSP International Awards of Excellence rewards pools which showcase the most beautiful and creative work in the industry. Many hundreds of entries are received each year representing members from around the world.

Swimming Pool & Spa Association (SPASA) State & National Awards of Excellence

SPASA is the peak representative body for the swimming pool and spa industry of Australia. Each year the local state division, SPASA WA, pays tribute to the best pools and spas created right here in Western Australia.

This is followed by the National SPASA Awards where winning projects from each state are judged together to determine the most innovative and inspiring pools and spas in the country.

QUALITY GUARANTEED

Sapphire Pools is a quality assured company. Our pools are Product Certified and built to Australian Standards under licence number 1906. For your peace of mind, always ask your builder for their licence number.

We are also an ISO 9001 accredited pool builder under licence FS 520856. This means our pools are built in compliance with a Quality Management System as set out by the International Standards Organisation (ISO). This commitment to excellence in both product and processes means you can be sure to receive a product that is finished with all the care and attention required to pass rigorous quality standards.

As the largest swimming pool manufacturer in Australia, every Sapphire pool is made here in WA. Each one is constructed using Swimming Pool Grade Reinforced Fibreglass and Resins, specifically designed for pools and is batched daily taking into consideration ambient conditions to guarantee optimum quality.

Each pool is inspected and tested after each layer of application as well as after the fit-out of all fittings and again prior to dispatch. These strict quality procedures are the reason we are able to offer our customers an **Extended Lifetime Structural Warranty*** on all of our fibreglass pools.

As an authorised builder of Pool ColourGuard™ swimming pools, all our fibreglass pools are also available with the world's first **Lifetime Interior Surface Guarantee***. This means you can rest assured your stunning pool colour will not fade or change and shall remain vibrant and stunning for many years to come.

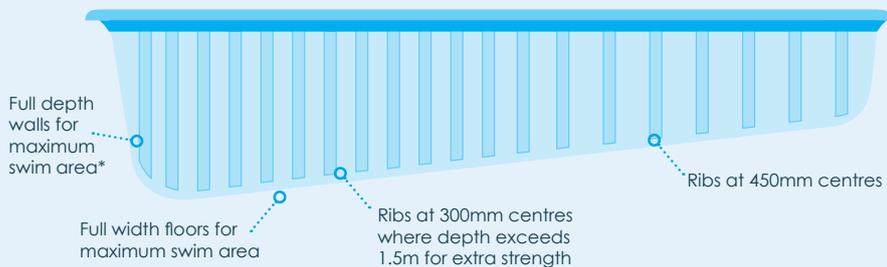

Sapphire Pools are proud members of the Swimming Pool and Spa Association of Western Australia (SPASA WA). This membership provides you with many additional benefits, including the **SPASA Completion Guarantee** for your protection.

With the combination of superior quality pools, optimum performance equipment and excellent customer service, you can depend on Sapphire Pools to provide you with the best swimming pool for your investment.

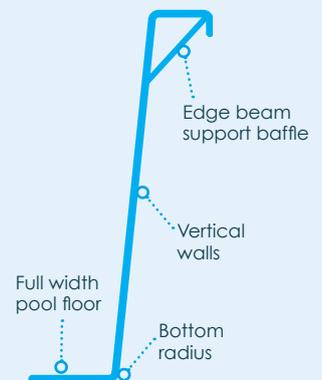

POOLS BUILT TO LAST

END ELEVATION

Standard underwater light position may be varied or deleted

Fiberglass reinforcing ribs at 300mm centres. Ribs continuous from cove at floor to underside edge beam

EDGE BEAM REINFORCEMENT

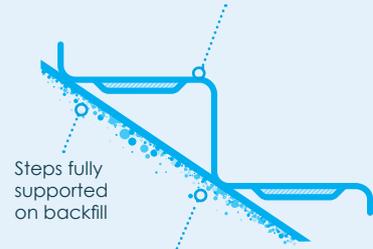

Non-slip surface on edge beam

Underside of edge beam fully enclosed with stiffening fiberglass for extra strength and rigidity. Prevents voids in backfill.

STEP REINFORCEMENT

Each walk-in step reinforced with polyurethane and covered with double thickness fiberglass lay up

Underside of walk steps fully enclosed with fiberglass to prevent voids in backfill

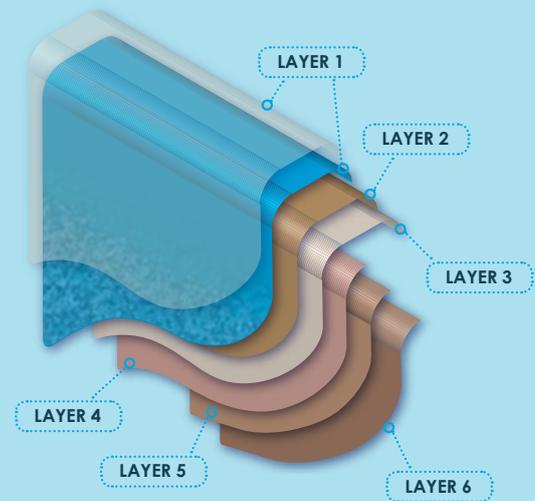

*Excludes safety ledge

SIX LAYERS OF STRENGTH.

Every Sapphire pool is constructed using advanced manufacturing techniques with a durable six layer system including Ceramashield® for maximum strength and rigidity. Developed from ground-breaking ceramics technology, Ceramashield® protects the pools surface from within by providing a barrier against the damaging effects of pool chemicals and ultra-violet light while also improving impact resistance and thermal insulation.

The result is a strong pool and vibrant colour that lasts.

LAYER 1: GELCOAT INTERIOR SURFACE

This layer is the pool's colour and is made using the highest-grade Isophthalic NPG gelcoat together with fade resistant pigments and superior materials for lasting, vibrant pool colour.

LAYER 2: CERAMASHIELD® CORROSION BARRIER

Ceramic enhancers and vinyl esters combine at this layer to protect the gelcoat cosmetic surface from within and greatly improves water, chemical and heat resistance for a pool that is built to last.

LAYER 3: PRIMARY STRUCTURAL LAYER

The initial strength increasing structural layer. A high-quality resin is used to further enhance the pools resistance to water and chemicals.

LAYER 4: MAXI-STRENGTH STRUCTURAL LAYER

Specialised enhancers, including an inert ceramic, are added to the fibreglass and resin mix within this layer. This increases the stiffness of the structural laminate by 47% over conventional systems.

LAYER 5: SECOND MAXI-STRENGTH STRUCTURAL LAYER

A vital extra section for maximum pool strength and rigidity

LAYER 6: OUTER FINISHING COAT

The final barrier protecting your pool from external elements

Each vital layer in the system is individually adhered to the next using a **Matched Lamination System**. This sophisticated method ensures maximum bond and prevents gradual separation of the pools layers, known as de-lamination.

SAFETY POOLS

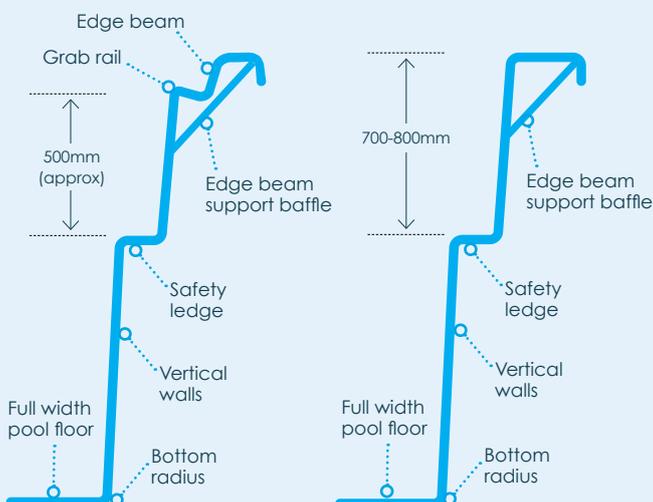

We also offer an exclusive safety range of swimming pools with a unique safety ledge, available in a selection of sizes to suit your needs. Ideal for families with young children or situations where adults need extra safety in the pool, the safety ledge also has the added advantage of giving the pool increased structural integrity.

COLOUR THAT WILL NOT FADE

PoolColourGuard

Advanced Technology in Fibreglass Swimming Pools

WITH A LIFETIME INTERIOR SURFACE GUARANTEE*

Hydrawall Pool ColourGuard™ is a world first, non-fade surface protection system for fibreglass pools.

Backed by a manufacturer direct, Lifetime Interior Surface Guarantee*, a pool with Pool ColourGuard™ will remain vibrant for years to come.

When you choose a pool with Pool ColourGuard™ you can expect a long list of unique benefits including the following:

- ✔ **Brilliant, vivid pool colour that will not fade or change**
- ✔ **Highest protection against UV rays and pool chemicals**
No bleach marks or surface degradation for the life of your pool
- ✔ **Stunning, high gloss finish never before seen on swimming pools**
- ✔ **Lasting gloss retention**
A smoother, high gloss surface that resists staining and is easier to clean
- ✔ **Protection against blisters and cracks**
Pool ColourGuard™ protects your pool from minute blistering in the cosmetic surfaces and structural osmosis blistering and also eliminates the risk of the pool surface cracking from UV exposure over time.

POOL COLOURGUARD™ IS ONLY AVAILABLE THROUGH AUTHORISED POOL BUILDERS SUCH AS SAPPHIRE POOLS.

THE VERSATILITY OF CONCRETE

Sapphire Pools can create and construct a customised concrete pool to any shape and style you desire. A concrete pool is perfect if you have a restricted area and can even be incorporated into the construction of your new home.

With a wide selection of colours and internal surface finishes available, you can build a pool to perfectly blend into the surrounding area.

EVERY SAPPHIRE CONCRETE POOL IS COMPLETE WITH THE FOLLOWING STANDARD INCLUSIONS:

- Quality pool shell built to Australian Standards with a 15 year Structural Warranty
- White cement internal plaster finish
- 6m of combined entry-step, swim-out or seat area
- Step and tread tiles fitted to the edge of all steps, seats and swim outs
- Row of 200mm x 200mm ceramic waterline tiles
- Row of standard reconstituted limestone bullnose header course
- Hi-rate pump and sand cartridge filter
- Underwater light with blue lens
- Skimmer box and 3 pool returns
- Excavation on a level sandy site
- Electrical connection to 40 metres
- Plans to Shire and Water Corporation
- Vacuum and cleaning accessories kit
- Instruction, initial clean and chemicals
- Pool Owner's Manual and test kit

THE FINISHING TOUCHES

There are many options you may like to consider with your new Sapphire swimming pool. Many of these items can provide the finishing touch to your family entertainment area. Ask one of our friendly and skilled and Design Consultants to discuss in more detail any of the below options:

- Landscaping Design Service
- Headers & Paving
- Fencing
- Waterfalls & Water Features
- Solar and Gas Heating
- Heater Pipes
- Automatic Pool Cleaners
- In Floor Cleaning System

BE SWIMMING IN SIX STEPS*

STEP 1 POOL SELECTION & APPROVALS

Once you have selected your pool design, Sapphire Pools will conduct a site inspection and take care of shire approvals on your behalf

STEP 2 SITE EXCAVATION

Prior to installation the site is excavated by bobcat and the hole prepared for your new pool

STEP 3 POOL INSTALLATION

Your new swimming pool is craned into position and checked to ensure it is level

STEP 4 BACKFILL, PLUMBING & ELECTRICS

The pool is backfilled and plumbing & electrical connections completed

STEP 5 ITS TIME TO ACCESSORISE

Once the water is in the pool, we can assist you with all the finishing touches including paving & fencing

STEP 6 GET SWIMMING!

Your completed Sapphire swimming pool is a picture of perfection and ready to enjoy

GET STARTED

*Applicable to fibreglass pools only.

YOUR QUESTIONS ANSWERED

Our experienced Design Consultants will guide you in selecting the right pool to suit your lifestyle and budget. To help you get started, here are some answers to some of the commonly asked questions on choosing a new swimming pool.

Q: When we are preparing our budget, what should we consider making allowances for?

A: As you can appreciate, there are many items to consider making allowances for, some you may wish to budget for now, others you may decide to add at a later date. Initially we always recommend a visit to your home by one of our Design Consultants who can provide expert advice on areas including:

- Landscape Design Services
- Pool location site conditions
- Swimming pool specifications
- Pool filtration systems
- Pool fencing requirements
- Retaining walls
- Pool heating
- Header courses and paving

Q: We are building a new home. What should we be considering at this stage?

A: This is the perfect time to consider installing a pool. We suggest the following:

- Your pool may need to go in before the house is built
- Have your own ideas on where you would like to have the pool located in your backyard
- Talk to us with your house plans so we can confirm that your chosen location will be the best position
- We can offer you advice on any ground work preparations and other areas that you need to give consideration to, such as ease of site access, security and fencing requirements, power requirements and sewer connections.

Q: What type, colour and size of pool should we choose?

A: There are so many variables when making your choice of pool. Your choice will depend on factors such as the size of your block and its ease of access. It is important to make sure that the pool you select is made from the highest quality materials available incorporating the latest in swimming pool technology. At Sapphire Pools each customer is taken through a customer checklist to ensure all needs are addressed.

Q: If we are too busy to visit a display centre, can a consultant visit our home?

A: Certainly! One of our Design Consultants will happily arrange to visit you at home at a time convenient to you. Our consultants will carry out a comprehensive site inspection and provide you with an assessment of areas including site access, site conditions, soil type, location of existing landscaping and reticulation, location of sewerage connections and existing power supply.

Q: What is the pool installation process once the purchase has been made?

A: Sapphire Pools has designed a proven customer co-ordination program to assist the pool installation process. You will be allocated a Customer Liaison Officer who will contact you regarding the steps involved in installing your pool. You will also be allocated an Installation Co-ordinator and together they will ensure the installation of your pool runs as smoothly as possible.
