## Ultra Skin Resurfacing: Microdermabrasion

Microdermabrasion is controlled skin exfoliation for all women and men looking for a smoother, clearer and more even complexion.

Ultra Skin Resurfacing: Microdermabrasion treatments offer gentle skin resurfacing and rejuvenation of the face, neck, decollete', hands and back. The treatment is effortless, painless with immediate results without any downtime.

It cleanses and refines pores while promoting collagen and elastin production in the rejuvenation of skin cells for healthier and more radiant skin.

The treatments have been proven to be extremely effective in minimising the appearance of:

- fine or deep lines and wrinkles
- hyperpigmentation and age spots
- ageing and sun damaged skin
- enlarged or blocked pores
- oily and congested skin
- acne scarring

A single treatment is beneficial for everyone. However, for any corrective procedures a series of treatments is recommended.

Achieve real and visible results.
