### What Are The Benefits For My Business?

Australian Training Consultants will consult with you to provide the most suitable training solution for your business and staff. By incorporating the most suitable training for your staff, the business will benefit through better skilled and productive employees. In turn, the employees are rewarded by gaining a Nationally Recognised Qualification and higher job satisfaction.

### How Is The Training Delivered?

All training is performed at a mutually agreed time. Training is structured with minimal impact to day to day operations and can be incorporated within an employee's daily activity.

### How does it work?

The Federal Government offers an incentive for your company of up to \$4,000 (Tax Free) per eligible employee of any age.

In most cases, the cost of the training is usually covered by the Government Incentive.

### How Do I Find Out If My Employees Are Eligible?

All you need to do is provide Australian Training Consultants with a list of your employees name and date of birth. We will then have this assessed and let you know who is eligible. The assessment is totally obligation free!

### What Next?

Contact Australian Training Consultants to begin the process!

You will be made aware of any incentives that you are entitled to and the duration of training before the enrolments take place.
