

A modern shower enclosure with glass panels and chrome fixtures. The enclosure is semi-frameless, with a clean, elegant design. It features a handheld showerhead, a fixed showerhead, and a built-in shelf. The floor is tiled with dark grey tiles, and the walls are covered in white tiles. The overall aesthetic is minimalist and functional.

Shadow Semi-Frameless

clean, elegant yet cost-effective

The Tabicat logo consists of a stylized, curved line that forms a partial circle, followed by the word "Tabicat" in a bold, sans-serif font.

Tabicat

Designed to reduce leakage and optimize ease of cleaning, The Shadow by Tabicat features a minimal profile, toughened glass panels, and the highest-quality aluminium components of their type.

Elegant Semi-Frameless Solutions

A semi-frameless shower screen is an attractive intermediate option between fully framed and frameless, offering a clean look without the need for excessively robust materials. The Shadow Semi-Frameless Shower Screen by Tabicat is a unique combination of frameless and semi-frameless concepts, designed to circumvent many of the problematic aspects of existing semi-frameless shower screens.

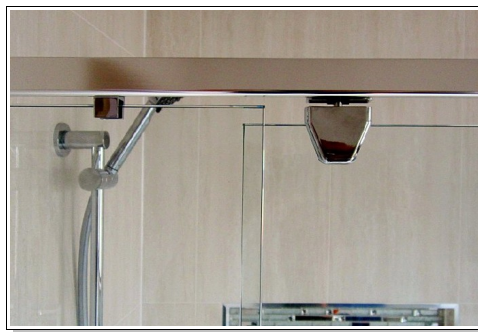

Clean and Minimal

Just like our frameless screens, the Shadow is designed and manufactured with quality and care; custom-fitted to perfectly suit your bathroom, to ensure a tidy and minimal seal.

The Shadow by Tabicat:

- ◆ Eliminates the use of glazing rubbers, which accumulate soap, mildew and other residue, and are prone to discoloration and deterioration over time.
- ◆ Uses a minimal amount of aluminium, to further prevent accumulation of soap and residue. Channels which will collect and allow water to stagnate are not used.
- ◆ Made from locally manufactured 6mm toughened glass which meets Australian standards, and never laminated glass, which is prone to discoloration and "brown creep" over time.
- ◆ Utilizes an unobtrusive polycarbonate strike and overlapping door system to protect against leakage.
- ◆ Features a door pivot system which is more lightweight than our robust frameless hinges, but is still the best of its type.

Available Styles

The Shadow is available in 90° and 180° front-only styles, which can be designed to accommodate inline panels in addition to sidelite, as well as on-hob or dogleg return panels. Also available are 135° splay styles. Aluminium profiles are available in satin and chrome.
