

DON'T SUFFER WITH MUDDY, BOGGY AREAS THE SOLUTION IS

DIAMOND GRIDS

DIAMOND GRIDS can be used to resurface a whole paddock/yard, or just the boggy corners and gateways. They are economical, easy to install and, best of all, require no ongoing maintenance, even in areas of heavy use.

DIAMOND GRID IS AUSTRALIAN MADE & 100% RECYCLED

HOW DO THEY WORK?

DIAMOND GRIDS create a multi-layered drainage system that drains water from the surface, reducing erosion and eliminating compaction of the substructure. The result is a surface that is solid, dry and secure even with constant use and in heavy rainfall.

MUDDY Paddock LANEWAYS

DIAMOND GRIDS SURFACE STABILISATION SOLUTIONS ARE IDEAL FOR AREAS SUCH AS:

- ↳ Muddy day yards;
- ↳ Gate entrances;
- ↳ Areas under water troughs; and
- ↳ Areas around feed bins.

DAY YARDS Parbery Performance Horses

ROAD BASE - Lay 50mm of road base to give a solid, level surface to lay the grids on.

FILL - Fill the grids with 10mm gravel to assist drainage.
TOP SURFACE - Sand, wood shavings & wood chip are popular choices for surfaces in day yards.
