USING A BUILDING DESIGNER

I am proud to be a Member of the **Building Designers Association of Victoria**. The BDAV is a respected, active industry body representing more than 1,100 building design professionals who, like myself, offer a broad depth of experience and expertise to meet our clients' needs.

By using a **BDVA Member**, you have the security of knowing that you are engaging the services of a professional who is committed to providing the right solution for your project.

In order to prepare design and construction documentation, **Building Designers** are required to be registered under the relevant Acts, and to carry the required **Professional Indemnity insurance**.

Further, because **BDVA Members** regularly participate in the **BDVA's Continuing Professional Development** program, we continually update our knowledge on a broad range of issues that may impact your design, including changes to regulations, environmental issues, technical matters, and much more.

BDVA Members can produce the design for your residential or commercial project, from a brief or a sketch you may have developed, or an idea you have in mind. You can be assured that your investment in the services of a **BDVA Member** will reap the return of a highly-successful building project.

For further information about why you should engage a **BDVA Member**, visit: www.bdav.org.au
