OVERVIEW

FIXMYGOODS service provision extends to all major kitchen and laundry appliances from all leading manufacturers and brands available in Australia.

We provide on site repair at your home or place of business. Today's overriding reliance on modern appliances ensures the smooth operation of household requirements and the necessity of these appliances to facilitate our busy lives and schedules.

FIXMYGOODS understands the need to offer a quick repair response at a cost effective and professional manner. It is our aim to arrive promptly at the appointed time slot. We ensure you are given prior notice of our arrival so that you can organise your time and schedule. We understand that running our busy work and family obligations requires a technician that is flexible and accomodating and one who can diligently and promptly fix your appliances. We ensure 100% satisfaction guarantee with extensive warranty on works carried out.

Dishwasher DISHWASHER

- Dishwasher
- Oven
- Cooktop
- Washer
- Refrigerator
- Clothes dryer
- Range Hoods
- Microwave

Once considered a luxury, dishwashers have become an integral part of the household routine. The majority of households prefer not to wash by hand, especially after a busy work or daily schedule, and enjoy the convenience and water saving features of a dishwasher.

Common Dishwasher repair problems are

- Dishwasher will not start
- Blocked or leaking dishwasher
- Water will not drain
- Dishes are not cleaned adequately
- Dishwasher is noisy
- Dishwasher emits burning smell
- Dishwasher causing the electricity fuse to trip
- Dishwasher not heating
- Door not closing or opening

OVEN

FIXMYGOODS are specialists in oven repairs for both domestic and semi-commercial kitchens. We can repair common faults with ovens whether you have a conventional oven, fan forced or multi-function oven. Even where parts may still be required for an oven service, the overall cost of repair is often much cheaper than replacement.

Common Oven repair problems are

- The electric oven will not start or the oven does not heat
- The oven fan works but there is no heat
- The grill works but the main oven does not work
- The fan is noisy
- The oven door will not close properly
- The oven does not maintain the desired temperature

COOKTOP

If you try to repair your cooktop on your own without the proper training, it can be time consuming and dangerous! The fully trained and experienced technicians at FIXMYGOODS are ready and willing to assist.

FIXMYGOODS has been providing top quality Cook-Top repair and maintenance service to homes and small businesses. We repair and service all brands of residential and semi-commercial Cook-Tops.

Common Cooktop repair problems are

- Cooktop will not ignite
- Uneven distribution of heat
- Cooktop element not regulating the temperature
- Element not turning on
- Glass hob broken
- Induction Cooktop not powering up

WASHER

Problems with washing machines are varied and can be difficult to diagnose and even harder to repair if you're not a trained washing machine service technician. We can repair your washing machine onsite whether you have a top loader or front loader washing machine.

Common Washer repair problems are

- The washing machine will not start
- The washing machine stops mid-cycle
- The machine will not tumble or spin
- No water coming into the washing machine
- Leaking washing machine or the water will not drain out
- Clothes are not cleaned adequately
- Washing machine is noisy and makes a rattling sound
- Washing machine emits burning smell
- Washing machine door would not open

REFRIGERATOR

Fridge repairs can be quite difficult and better left to the experts. We can repair common faults with fridges whether you have a two door fridge, a fridge with a freezer on the top or bottom or a side by side freezer.

Common fridge repair problems are

- Water is leaking inside the refrigerator
- The fridge is cooling excessively
- Fridge is not cooling enough
- The fridge is excessively noisy
- The freezer is working, but the fridge isn't
- The light inside the fridge does not work
- Freezer section is icing up
- Door seal needs replacement
- Ice-maker does not work

CLOTHES DRYER

Once considered an indulgence, clothes dryers are becoming an indispensable household appliance especially in cooler rainy climates or in apartment blocks. Many people would be lost without the convenience that a clothes dryer provides. Clothes dryers need regular servicing to remove the build up of lint inside the machine which is a major source of fire.

Common Clothes Dryer repair problems are

- Clothes dryer will not run
- Clothes dryer does not heat
- Clothes are not dried adequately
- Clothes take too long to dry
- Clothes dryer is noisy or making a rattling sound

RANGE HOODS

Rangehoods are an essential part of the kitchen to ensure adequate ventilation in a kitchen, yet they are often neglected. We can repair your rangehood onsite whether it's a canopy, fixed or under mount, and retractable or slide out rangehood.

Common rangehood repair problems are

- The rangehood does not turn on
- The rangehood does not provide adequate ventilation
- The rangehood is making excessive noise
- The rangehood emits burning smell or other unsightly odours

MICROWAVE

In today's fast paced society, microwaves are an essential household appliance and need to be repaired quickly but trying to repair your microwave can be dangerous if you aren't qualified. Although the cost of microwaves have come down in recent years, some convection or integrated microwaves still warrant repairs as the cost of replacement far exceeds repair costs.

Common Microwave repair problems are

- The microwave will not start
- Inside of the microwave oven does not light up
- Carousel will not turn
- Touch pad does not work or works erratically
- Microwave activates but it does not heat food adequately
- Sparks are visible inside the microwave
- Convection oven does not heat up.
