"We no longer drive out to visit our shops,
We can see what's happening from home"

Bakery Owners

For almost a decade, AUCOM Surveillance has been providing complete Security Camera CCTV Packages to the Retail and Manufacturing industries as well as Car Parks, Construction, Office Blocks, Hotels, Warehousing and general surveillance.

Easy to use. Simple and intuitive menu allows easy access to recorded footage.

Months of recording. With the 1.0Tb Storage built in, rest assured that you have ample footage available of past events.

Backup the Evidence. You can easily back up events to a USB Stick or Hard Drive or even remotely from another computer.

Full Installation available. All Kits are shipped with cables for easy installation, however, if the site you want to monitor is in a remote location or you don't have time, we have installers located Australia Wide.

Finance or Leasing. Finance and Leasing options are available. 100% Tax Deductible when used for business purposes. End of term options include purchasing, re-renting, upgrading or simply returning your equipment.

details:

Ultra High-Resolution

Latest 700TVL SONY CCD for crystal clear images.

H.264 Latest Compression

The H264 Codec used is the same as the one used in Blue Ray Digital Video Disks.

Remote Monitoring

It has never been easier to view your Security Cameras from anywhere in the world.

Motion Detection

Every Recorder comes pre-configured for Motion Activated Recording. Continuous and Scheduled recording can also be used.

Pre-Event Recording

With Pre-Event Recording, you never miss the important seconds leading up to the motion taking place.

USB Mouse Support

Connecting a mouse makes navigation even easier.

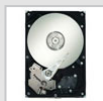

POS Integration

Use the optional USB adapter to log transactions directly from your Point Of Sale system.

Pan Tilt Zoom Control

Easily control any Pan-Tilt-Zoom Cameras directly from the recorder or remote monitoring software.

HUGE 1Tb Storage

1 terabyte Storage ensures ample video storage.

SONY 1/3' Cameras

The SONY CCD Sensor has a higher resolution, better white balance, better low light performance and even easier mounting options for even faster installation and crisper and more vibrant images.

Email Notification

Email attachments can include images or even video clips from the camera that detected the motion.

Dynamic DNS

Automatically updates the IP address and eliminates the need for a static IP address.

NTP Client

The Built-In Network Time Protocol Client synchronises the system's time to the global time server.

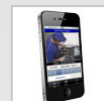

Alarming Options

Flexible inputs can integrate with external devices such as sirens, sensors, reed switches, etc.

Flexible USB Ports

USB Ports support external Memory Sticks and Hard Drives and can provide power to the portable monitor.

iPad/iPhone viewer

You can now download our FREE iPhone App to view your cameras LIVE on your iPhone or iPad. Don't have an iPhone? We also have Blackberry and Android viewers available.

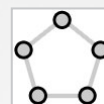

Monitor Included

The kit comes bundled with a 3.5 inch portable monitor with audio. Monitor comes with a wall bracket for easy installation.

Dual Streaming

Dual Streaming allows for high refresh rates across even the slowest network connections.

Pentaplex Operation

True Pentaplex System allows you to view footage remotely and back up existing data, all while recording in the background.

Watermarking

Watermark Protection ensures the authenticity of images and video.

2 Way Audio

An optional microphone is available for recording or transmitting Audio

Multiple Monitors

Multiple Video outputs make it possible to set up multiple screens as a deterrent to potential criminals.
