

reline repair renew

Fix your pipes from the inside!

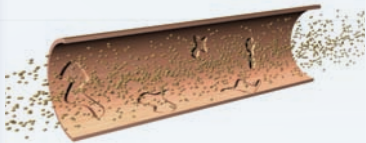

Problem Solved, Guaranteed! – Less Time! Less Mess! Less Money!

Leaks?

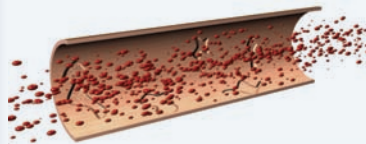

How it Works for Hot & Cold Lines

1. Corroded pipes are sand blasted to prepare for rehabilitation

2. "Shots" of epoxy are then moved throughout the entire piping system

3. The end result is a permanent epoxy barrier between your pipes and your water

Diameters 12mm to 300mm

No more pinhole leaks or heavy metals leaching into your water!

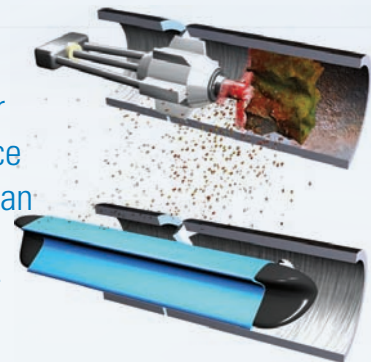

Back ups?

How it Works for Drain Lines

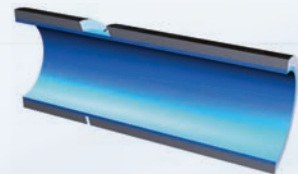

1. Blocked and root intruded pipes are cleaned with a high pressure jetter

2. An epoxy impregnated liner is pulled into place and inflated with an internal rubber bladder. The liner is left to cure.

3. The bladder is removed leaving behind a "pipe within a pipe".

Diameters 40mm to 1metre

No more scale build up or root intrusion!

40 year guarantee
