We Offer The Very Best in TV Antenna, Home theater digital antenna and Alarm and Home Networking installations.

About Us

We are a family based business located in the Hills district of Sydney.

We are committed to provide the best service using the best materials at the best price.

With a combined electronic experience of over 50 years and still with the passion to continue our business we intend on being there for a long time to come.

Having owned and run an authorized electronic service center specializing in home entertainment equipment you can be confident that your electronic equipment is installed for your optimum viewing and listening experience.

As our son intends to eventually take over the family business you can rely on us being there for you and your warranty should any issues arise, unlike many other companies that just disappear.

If you want reliable and quality service please consider Digital Antenna Solutions. Our promise to you is to provide a friendly and informative experience while giving you the best possible installation with the assurance that we will be there in times to come.
