

## TIPS FOR SUCCESSFUL WAXING

WAX approximately 4 weeks apart for optimal growth phase to occur.

EXFOLIATE approximately 2 to 3 times a week with a natural loofah.

EXFOLIATE the area to be treated for waxing at least 24 hours prior.

PREFERABLY use a natural loofah using gentle but firm circular motions. It is not recommended that you use body scrub or harsh soap while you loofah. Follow with a suitable moisturiser.

DO NOT use body moisturiser or oil in the 12 hours preceding wax.

DO NOT follow waxing treatment with strenuous exercise, sunbathing, sun beds or deodorants, wait 24 hours.

DO NOT wax if you are on medication such as Retin A or Accutane.

IF you suffer from in-grown hair, your skin care therapist can offer you advice about home care and maintenance.

TEENAGERS should begin waxing at the time they wish to start shaving.

BE patient when you begin waxing, there is usually a time period of 2 to 3 wax sessions before you achieve the best results from your waxing.

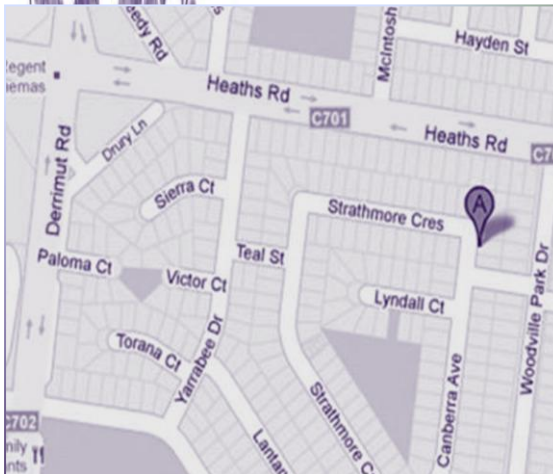

REPEAT waxing makes the hair softer and less plentiful
