**FABRICATION**  
-----  
-----

### Turret Punch

We have an AMADA Pega 357 which can punch a sheet of 3600x1270. The AMADA Pega 357 consists of auto indexing stations with repositioning.

### **Plasma Cutting**

Capital Precision Components has a fully automated HI-Definition Plasma Cutting machine with a 1800x3600mm bed and a state of the art CAD system.

### **Laser Cutting**

We are able to cut up to 12mm mild steel, 10mm stainless steel and 5mm stainless steel clean cut with the finest of edges on any item made to order.

### **Folding/Bending**

We own an AMADA Promecam Break Press to provide a better finish and very close tolerance and quick turnaround to our customers.

### **Welding**

We have in-house welding services to suit any requirements of our customers. Our welding section has facility using TIG, MIG, Spot, Stick (or Arc) and Projection welding applications.

### **SPM Machines**

Capital Precision Components introduced new SPM (Special Purpose Machines) in to the factory, to reduce the manufacturing time consumed in small jobs. Now we have a vast collection of different punches and dies and special punch and dies especially for the small volume jobs.

---

### ***MODIFICATION & REPAIRS***

---

We also offer services in modifying or repairing existing goods to provide our customers with a range of services under one roof.

---

### ***OUTSOURCING OF COMPONENTS AND PRODUCTS***

---

Capital Precision Components works with a network of trusted powder coaters, electro platers and specialists who provide quality finishing which means it saves you from looking for suppliers.

---

### ***CAD DRAWINGS***

---

We accept drawings in DXF and DWG formats. We can also draw your hand drawn drawing into a CAD DXF format where CAD drawings are not provided.
