Document Solutions
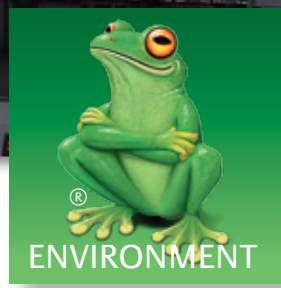

Things to consider when buying

Cost

The ongoing running costs of printers and MFPs is often overlooked when making purchase decisions. The impact of doing this could result in your running costs adding up to two or three times the original purchase price. Companies both large and small can make significant savings with Kyocera.

Reliability

Kyocera introduced the cartridge-free imaging concept in 1992. The result is printers and copiers which create less waste, have a lower comparable cost per print and less downtime, making them up to 50 per cent less expensive to operate than comparative models and much more reliable.

Support

Kyocera's support program has been developed around our customers and reaches far beyond service calls. Pro-active maintenance, fleet rationalisation strategies and recycling programs, together with our award-winning reliability, provide one of the most effective support networks in the market.

Environmental impact

The importance of having respect for, and conserving our environment has been etched in Kyocera's ethos from inception. Our worldwide green policies encourage conservation and recycling, along with the development of products and technologies that can actually minimise the impact on the environment.

How to choose

Making the choice between printers, copiers and Multifunction Devices (MFDs) can be difficult but there are a few questions that you can ask yourself to help make the process easier.

1 - Do I need to print in colour?
2 - Do I copy documents as well as print?
3 - How many people will share the product?
4 - How many pages would I print a month?
5 - What are the running costs?
6 - Should I integrate and rationalise my copiers and printers?

Kyocera can assist you with determining what's the best option for your organisation, with a fully integrated product range and online total running cost calculator located at **www.KyoceraDocumentSolutions.com.au/tco**

KYOCERA LEADS THE WAY

Conventional cartridge

Kyocera ECOSYS toner kit

ECOSYS Technology

Conventional printers use an imaging cartridge that integrates a photoreceptor drum, developer and toner into a single, disposable unit. When the toner is depleted, the entire cartridge is disposed of and replaced with a new unit. In contrast, ECOSYS® printers feature a durable imaging system based on Kyocera's patented amorphous silicon print drum, a combination of ceramic and metal. With a surface that is second only to diamond in hardness, Kyocera's durable print drum is guaranteed up to 500,000 pages on some series models. That's because tiny ceramic particles embedded in Kyocera's toner continually polish and recondition the drum during normal printing, virtually eliminating the need for replacement of the drum and other cartridge components (a task which is typically performed many times over the life of a conventional printer).

The result is printers and copiers which create less waste and have a lower comparable cost per print and less downtime, making them up to 50 per cent less expensive to operate than comparative models and much more reliable.

Save with Kyocera

Did you realise that the cost of running your laser printer over its lifetime is likely to exceed the original purchase price by several times?

Unfortunately, the ongoing running costs of printers, copiers and MFDs is often overlooked when making purchase decisions. The impact of doing this could result in your running costs adding up to two or three times the original purchase price. Businesses both large and small can make significant savings.

With our ECOSYS printer technology – which produces more and uses less – Kyocera has one of the lowest Total Cost of Ownership (TCO) in the market today.

So, just how much could you save? See for yourself with our online TCO calculator. It allows you to compare the true cost of owning and operating a Kyocera ECOSYS laser printer against competitor models online.

The calculator will provide you with a comparative breakdown of all major running costs associated with your printer and give a comprehensive report that demonstrates just how Kyocera's innovative ECOSYS technology can save you money.

To use our online TCO calculator, please visit www.KyoceraDocumentSolutions.com.au/tco

Colour Printers

Personal and Workgroup
Colour Printers

Welcome to the world of Kyocera colour. Our range of colour printers are ideally suited to business, delivering affordable, high quality colour printing.

A3 Colour
Multifunction Printers

These new A4/A3 multifunction colour devices offer all the benefits of a professional document management solution for workgroups and small offices. Featuring advanced functionality, easy to operate touchscreen, and a range of paper-handling options, all in a well-designed compact package. Cost-efficient and eco-friendly offices will appreciate KYOCERA's unique ECOSYS technology which increases operating life, reduces environmental impact, cuts printing costs and ensures reliability.

KYOCERA

Document Solutions
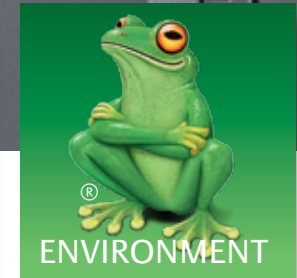

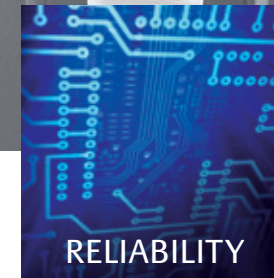

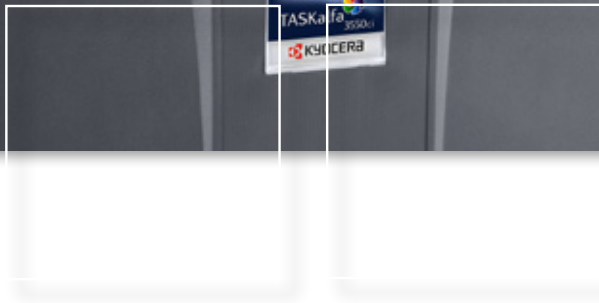

Things to consider when buying

Document Creation & Output

Printing the business documents you create and use everyday is essential for effective communication, both inside and outside your business. Kyocera's Solutions for document creation and output improve workplace productivity and efficiency. Kyocera's native page description language, PRESCRIBE®, offers your business a flexible, on-demand printing solution for forms, letterheads and similar corporate documents. PRESCRIBE eliminates both cost and storage space associated with pre-printed forms. Enhance your Windows® desktop through Kyocera's KX Driver and PDF Direct Print for fast printing and full access to device features. Another robust output feature is Kyocera's USB Host Interface. At the control panel, users can print-from, and scan to, a USB drive inserted into the device. This ensures both confidentiality and efficient output time after time.

Security & Compliance

Securing your business assets and maintaining confidentiality of data is a growing strategic initiative for many companies. Kyocera's solutions addressing security and compliance are incredibly flexible to fit the needs of your diverse network and your company's printing, copying or scanning requirements.

Kyocera provides a range of optional security solutions: Our Data Security Kit ensures your business critical information is never compromised; device printing features such as Secure Print and Virtual Mailbox require passwords to enable output directly at the device, and the KX Driver allows you to add a Security Watermark to your documents to deter unauthorized copying. For businesses and organisations instituting IPv6 (Internet Protocol version 6) to their infrastructure, an IPv6-compliant network interface for Kyocera Printers and MFDs ensures compliance and security standards can be met.

Document Management

For businesses requiring 'on-demand' access of documents at the MFD, Kyocera's Document Box is a critical feature that allows users to scan-to, and print from, the hard drive of your MFD. Kyocera's Document Management Solutions are scalable and flexible for your business, delivering a solution that fits your company's requirements today, and an upgrade path for your growing requirements tomorrow.

Network & Device Management

Kyocera's suite of Network and Device Management Solutions provides your IT infrastructure with the essential tools it needs to manage and maintain your output devices, keeping your operation running efficiently. This comprehensive set of value-added utilities and software include the PC-based KYOCERA Net Viewer and web-based KYOCERA Net Admin for device management, cost control and department accounting.

Only from Kyocera

Since 1959, Kyocera has successfully developed innovative technologies that have helped set industry standards for engineering and quality. In the field of document imaging, Kyocera is a well-known and respected provider of leading-edge multifunction products and laser printers, as well as software and network solutions to organisations of all sizes and specialisations.

Our award-winning technology incorporates long life imaging components that can dramatically lower your total cost while providing the high productivity and exceptional image quality that your business demands. Kyocera continually strives to raise the bar for excellence in both products and service.

Designed with people in mind, the Kyocera **TASKalfa Series** defines colour and monochrome multifunction devices (MFD) in a whole new way, delivering the **power, performance, quality** and **ultra-reliability** that your growing business demands. So whether you print, scan, copy or fax – in colour or monochrome – this series will become an essential partner to your business.

Engineered for the critical demands of any business, each TASKalfa Colour MFD features a **sleek design** on the outside, but more importantly, **advanced imaging technology** on the inside. The powerful combination of fast output speeds, Kyocera's unique long life technology, solution integration capabilities, and consistent high-image quality engineered into each TASKalfa MFD assures **superior document imaging** every time. **That's TASKalfa's number one priority.**

Colour
Multifunction Devices

The TASKalfa line of colour and monochrome MFDs are the pinnacle of document imaging because each business-critical task is delivered with unsurpassed performance, superior image quality and ease of use. The ultra-reliable technology designed and engineered into every Kyocera TASKalfa MFD enables users to get their tasks done right, the first time, and every time.

TASKalfa - the cornerstone of unprecedented document imaging efficiency for any organisation.

TASKalfa Monochrome MFDs

Monochrome
Multifunction Devices

The TASKalfa monochrome Series is extremely productive, offering fast scanning and finishing speeds, matched to high-capacity finishing options and high-volume paper feeders, designed to suit your specific requirements. Save time and reduce paper waste by printing on both sides with the standard duplex unit, or by scanning your documents and sending them as digital files. Choose from a number of paper feeders to suit different papers and formats, for fast continuous printing and high volume operations.

Awards and Recognition

Kyocera's achievements

Kyocera's advanced range of exceptional products, software and network solutions make life simpler and business more productive. We are proud that noted industry analysts, technology publications – even end users – have recognised and awarded our products.

Our accolades include:

BLI - Highly Recommended and Pick Awards
2012, 2011, 2010, 2009, 2008 and 2007

For over 45 years, Buyers Laboratory Inc. (BLI) has been a source of unbiased and reliable intelligence for the imaging industry. Although originally based in the US, in 2005, BLI launched its international division with offices in Hong Kong and London. BLI also provides certification testing, rating products on their ability to meet various benchmarks for reliability and performance. www.buyerslab.com

Better Buys for Business Editor's Choice
2010, 2009, 2008 and 2007

Better Buys for Business is a leading independent authority on document imaging equipment (copiers, printers, faxes, and scanners). To assure its independence, Better Buys for Business accepts no advertising - revenues are derived solely from the sales of its reports. www.betterbuys.com

Awards and Recognition

BERTL Office line of the Year 2012, BERTL Outstanding 2010, BERTL's Best 2009 and BERTL Exceptional 2009

For over 15 years BERTL® Inc. has been the primary source for objective, independent product evaluation reports and comparative analyses on digital imaging devices and workflow solutions. BERTL's evaluation reports, customer satisfaction research, awards and product ratings are undertaken entirely at BERTL's expense for the benefit of its worldwide subscriber base.

Office Products Analysts #1 Reliability MFDs 2009

Voted number 1 for reliability (MFDs) by leading research agency Office Products Analysts (OPA). www.industryanalysts.com

ARN IT Industry Awards

Finalist Specialist Vendor of the Year 2011
Highly Commended ARN Personal Innovation Award - Sales Excellence 2011
Highly Commended Green Vendor 2010
ARN 'Green Vendor of the Year 2007'

ARN, a key IT industry publication since 1991, held their inaugural industry awards in 2007. An independent panel of industry experts selected Kyocera as Green Vendor of the Year, a tribute to our thought leadership and green credentials. Recognised as a Finalist and Highly Comended in the 2011 ARN IT Industry Awards.
