

Absolute TreeLopping & Gardening Service

With many years experience and an exceptional reputation with our Customers and Clients, our small family business is here to give you reliable service at a reasonable price. We only deal with quality suppliers for our products/materials because we rely on our reputation and repeat business from our valued customers.

BEFORE: David listens and offers his professional advice.

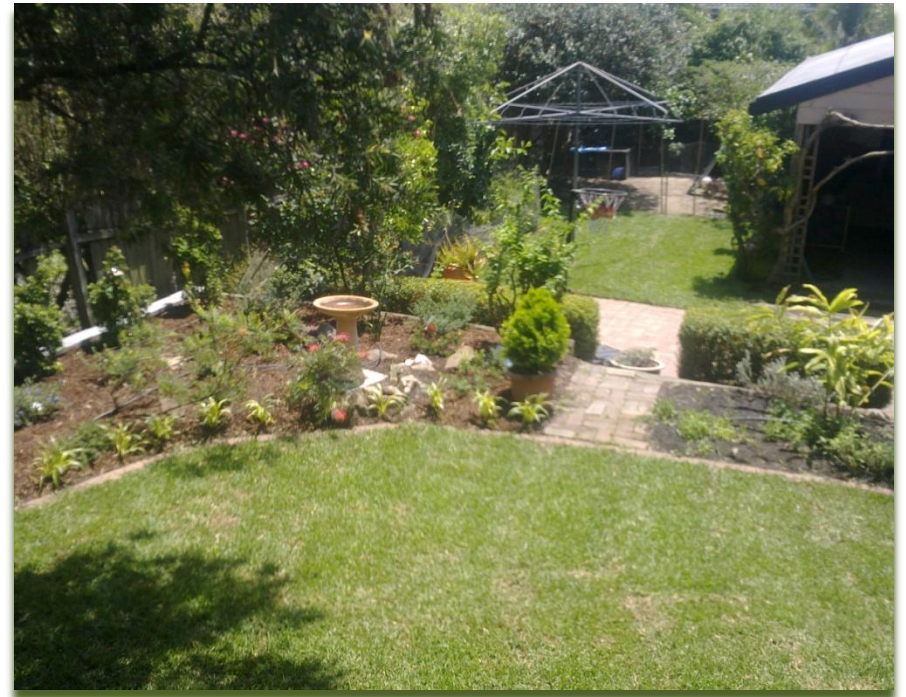

AFTER: Cleaned up with garden soil, horticultural mulch and shade plants added.

BEFORE: Back yard area before Absolute Treelopping & Gardening Service proceeds with establishing a water efficient native garden to the left (leaving some existing natives, as requested) and preparing to turf the higher and lower back areas.

AFTER: With the new retainer wall along the side fence, a general tidy up of existing trees, shrubs and hedges, new garden soil, plants, mulch and grass (turf) – excluding the vegetable patch on the right of the path (as requested by our valued Client), the update is nearly complete. Our next step is to install a water wise irrigation system.
