2 Hour Tanning?

Traditionally, a spray tan is left on for about 6 - 8 hours - showering after this washes away the bronzer revealing the developed tan underneath.

The difference with a 2HR tan is that you wash the solution off after 2 HOURS rather than 6.

You will notice after washing at 2 hours, the bronzer will wash away and you will appear to have no tan at all. It isn't until 3-4 hours after application that you will begin to rapidly see the tan revealing itself. The tan will peak in development at around 8-12 hours.

ADVANTAGES:

The application process takes less than 30 minutes.

Convenience to go about your day sooner.

No need to sleep in your tan - dirtying your sheets.

Lasts 7-10 days

Need to be tanned for a night out? Get sprayed after work - have a shower after two hours and get ready as usual. By the time you are out and dancing you will be tanned and getting browner by the minute as it continues to develop.

Why 3-stage Tan?

Stage 1

Application of a pH adjusting moisture spray will improve your skins ability to tan. Our Prep acts to moisten any areas of dry skin - creating a more even canvas for which to apply the tanning solution.

Stage 2

Choose your favourite tanning solution. (2 Hour Tan or 6 Hour Tan, light, Medium or Dark)

Stage 3

Hyaluronic Acid (HA) moisturises skin from the inside out, smoothing out wrinkles in the process. HA acts as an internal cosmetic to intensely hydrate the skin.

A booster of Erythrulose also extends the tan by up to two days. Your tan will last longer, fade better and look more vibrant with a 3-STAGE TAN !

“This is what customer service should be, I had forgotten what friendly service was before being looked after by Mountain Tan.”

There's Nothing Fake About a Mountain Tan!

99% Natural Ingredients

We use products with only the finest and purest forms of natural ingredients

Erythrulose Rich

Which gives you a more natural looking tan complexion and extends the life of your tan.

Pharmaceutically Pure DHA

Only the highest grade DHA has been used in formulating our solutions. It's quality you will see!

NO Artificial Preservatives

Mountain Tan uses No Artificial Preservatives!

Alcohol Free

Alcohol is extremely irritating and dehydrating. It can cause flare ups in acne and can shorten the life of your tan due to its intense drying property.

Paraben Free

Parabens are synthetic preservatives proven to increase Oestrogen levels, increasing the risk of breast cancer. Mountain Tan uses No Parabens!

Fragrance Free

Reduces the risk of allergic reaction.

Anti-Oxidant Rich

Fights the skin damage caused by harmful UVA + UVB radiation (ie. The Sun).
