

Brookfield® Celebrates 20 years of Success

Grower Rob Aitken congratulates Brookfield on 20 years and tells Stock and Land how he has been able to significantly improve his operation since 2006 when he invested in his first Brookfield D130 Dischain harrow.

Mr Aitken currently runs a highly successful 1500-hectare cropping operation on the property Wenona, 25 km north of Narrabri, NSW. He now owns three Brookfield D130 Dischains and says "the design innovation and development between his first machine in 2006 and the current machines is outstanding".

He believes that the success of Brookfield is their direct experience, close communication with farmers and willingness to consider any suggestions – including some from Mr Aitken himself which are now standard! "They believe in their machine because they have directly proven its performance and they back it up with excellent service" he says.

At Wenona, the Dischains are used for stubble mulching, ground levelling and weed kill all in one pass. "With chemical, fuel and labour costs ever increasing, being efficient is the key to the success of any operation in today's environment. The Dischain has vastly reduced our spraying costs, improved our soil composition through stubble mulching, rid us of wheel track problems and so the list goes on" said Mr Aitken. He also hires out the Brookfield machines and when asked if he'll be buying another Brookfield he replies without hesitation "definitely".

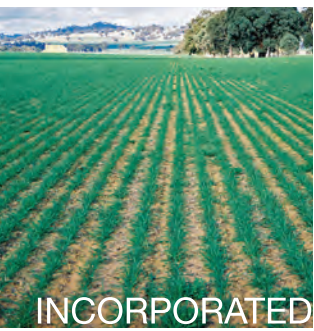

With over 300 machines in the field Brookfield have all the experience and expertise to improve your operation. CALL NOW on 1800 774 274 for more information and an obligation free quotation. Free BBQ on offer for all sales before March 31, 2013. Conditions Apply.

"They believe in their machine because they have directly proven its performance and they back it up with excellent service"

Rob with his best mate Ace and his sturdy and ever reliable Brookfield harrow (Dischain D130)
