

SPECIALTY SERVICES

Opti-Coat Pro +

POA

Opti-Coat is a hard wearing, ceramic clear coat for superior resistance to scratching (9H), and surface protection from chemical etching due to environmental impacts. Opti-Coat has better chemical resistance, scratch and mar resistance, and release properties than any automotive paint coating in use. It provides permanent protection for all modern factory paints. Opti-Coat is not a paint protection wax, sealant or nano coating that will wash away, or break down over time. Opti-Coat bonds permanently with the factory coating, protecting the surface indefinitely and will not delaminate. Opti-Coat is completely resistant to acidic environmental substances such as bird lime (bird droppings). Unlike your factory clear coating that can be permanently damaged, Opti-Coat will not etch or dissolve when in contact with these substances, and a clean, glossy clear coating is maintained.

Opti-Guard Fabric Coating

POA

Opti-Guard Fabric creates a superhydrophobic coating to protect fabric seats, carpets, fabric convertible tops and other textile surfaces. When liquids come in contact with Opti-Guard Fabric and closed loop textiles, the surface repels the substance and liquids roll off without penetrating or staining the material.

Additionally, for materials with an open structure such as plush carpets where liquids are able to penetrate the surface, the coating prevents any penetration of the fibres and permanent staining of the material.

Opti-Guard Leather

POA

Opti-Guard Leather & Vinyl creates a hydrophobic coating with concentrated UV absorbers to protect leather seats and dashboards from premature ageing, cracking, and other damage such as colour transfer and staining of leather seats. Opti-Guard Leather & Vinyl is an acrylic hybrid resin that creates a strong, yet flexible coating for these softer surfaces and high resistance to chemicals. The coating contains special matting agents to maintain the original factory appearance of the surface it is applied to.

Opti-Trim Restore & Protect

POA

Opti-Trim is a revolutionary two part system, to permanently solve the ongoing issue of faded plastic trim. Unlike other coatings that are limited in their lifespan and ability to prevent oxidation, Opti-Trim contains high levels of UV absorbers to help prevent future fading and provide a long term solution. Opti-Trim Protect is a clear, hybrid resin coating to help prevent new plastic trim from future fading due to UV exposure. For new cars, choose Opti-Trim Protect to enhance or maintain the factory appearance of your plastic trim. Opti-Trim Restore is a durable, hybrid resin coating containing special dye additives to restore faded and oxidised trim back to a like new, factory appearance. For older vehicles suffering from damaged trim due to UV exposure, choose Opti-Trim Restore to restore your plastic trim back to its former glory.

Ask us about our package deals to get fully Opti-Coat Pro + Protected

Opti-Glass Pro

POA

Opti-Glass Pro is designed to chemically bond to silica based surfaces such as automotive glass, to produce a superhydrophobic film. Opti-Glass Pro will increase driver visibility by repelling water that runs off the windscreen at low speeds, and also reduce stone chipping. Compared to silicone based glass sealants, Opti-Glass Pro has far superior durability and resistance to wiper abrasion.

Headlight Restoration

from \$44* (per headlight)

Cloudy or yellowed headlights can be dangerous, with reduced performance & can be unroadworthy. Why risk costly fines or endure the inconvenience of making call after call to find a new or even reconditioned headlight then spending time driving around & having it installed when we can come to you & restore your headlights to their original clarity for a fraction of the cost of new or even second hand headlights.

Shampooing

from \$110*

Vacuum & shampoo carpets & seats

Paint Correction/Full Cut & Polish

POA

This is the ultimate in paint work rejuvenation, removing light to medium scratches, oxidised paint, swirl marks & spider webbing. We painstakingly remove any contamination on the paintwork then utilising the latest in paint polishing technology & techniques we will restore your car's paintwork. Then to ensure that your car's paint remains in a faultless showroom condition we will apply our ultimate, Liquid Polymer Glass paint protection.
