“A Specialist in Female & Male
Reproductive Health, Fertility,
Pregnancy, Labour and Skin
Conditions”

- Heavy, painful periods impacting your social life, working life, and even holidays?
- Pre-menstrual mood swings so extreme you've considered psychiatric help?
- Periods irregular and very light?
- Unable to get pregnant, yet repeated tests show no explanation for infertility?
- Looking to improve your chances of IVF success?
- Pregnant and petrified of the pain of labour, yet concerned about the side-effects of pharmaceutical pain relief?
- Chronic skin condition that no creams or tablets seem to improve?

When the World says 'Give up!'
Hope whispers...
'Try it one more time!'
