Here's how to decide which Window Covering you should have in your bedrooms in Sydney.

The Right Window Covering Can Help You Achieve Light Control

When you are looking for **Blinds or Shutters**, consider the amount of light you want to let in. Sheer fabrics will allow light through while maintaining your privacy. Blackout Curtains ensure you won't be woken up at dawn. Decide how much light control you require. Use a combination to achieve light control for different times. For example, you could use a blackout blind for use at night layered with sheer Curtains. This will allow soft light through during the day. This layered look helps to serve two different functions.

Window Coverings Can Ensure Your Privacy

When selecting a Window Covering for your bedrooms you want to ensure your privacy. If you are away for extended periods of time, you might have Shutters installed. Your room is a private space, and you don't want outsiders to be able to see in. You can make the room pitch black with your Blinds, Shutters, Curtains or Awnings. You can also let light in during the day if you prefer. Contact Blindman for professional advice on your options.
