

## FM-750

The cornerstone of guidance, capable of 2.5 cm accuracy. The FM-750 has a built-in receiver that allows you to choose the accuracy you need from +/-20 cm to +/-2.5 cm pass-to-pass, year-to-year. When you need a DGPS guidance system that saves you time, fuel and inputs, look no further than the FM-750.

The FM-750 Display is compatible with Autonomous, OmniSTAR VBS, as well as OmniSTAR XP and HP. If required, when fitted to a compatible EZ-Steer system, the FM-750 can be upgraded to receive an RTK correction signal. This industry leading product can cater for all needs and can progress with you as your guidance requirements evolve.

20.3 cm touch screen  
With an all new intuitive user experience.

**Freeform™ guidance pattern**  
Offers the ultimate in guidance flexibility, allowing you to work in different patterns and shapes that best fit the layout and contours of your field. All of the guidance patterns below are available for use
