

Compounding Services Peak Pharmacies

**Personalised medicines
tailored specifically for *you*.**

Compounding is the art and science of creating personalised medicine. It all starts with a problem: the child who can't swallow pills, the patient with a gluten allergy, the much-needed drug that's in short supply or the discontinued medication. For whatever reason, many people aren't served by mass-produced medications.

**Peak Pharmacies can now provide a
solution with our compounding services.**

**Professional Advice
you can rely on**
