

! WARNING

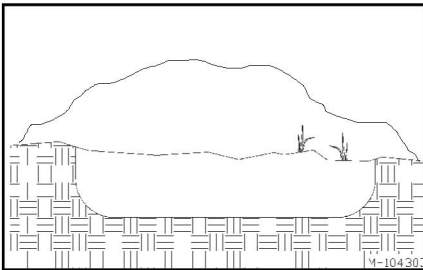

Ensure sufficient space is around the stump. Any drip feeders will become entangled and may be pulled out of the ground. Pavers, stones, rocks or pebbles can cause damage and create flying objects

! WARNING

We can only be insured for above ground damage. It is your responsibility to inform us of any underground wires and / or plumbing. These are usually 600m deep and avoid the 300m depth of the grinder.

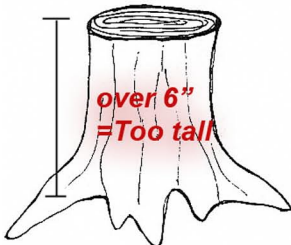

When the stump is completely removed (approx 300m deep) the ground wood and dirt will be put back in as fill. This usually leaves a mound above ground level.

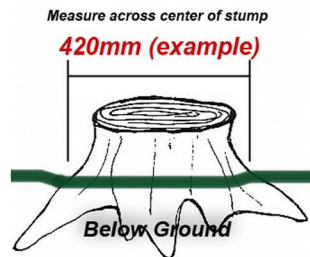

Self Quotation requires a measuring tape and the following guidelines. The stump machine requires gates to be a minimum width of 91cm. It is usually possible to remove hinged gates to allow extra room. We can remove and replace gates for only \$10 per gate. 90° turns around corners of the house can be done providing no fences or high retaining walls are within close proximity.

\$2 per cm of the stumps diameter

If the stump is more than 6 inches above ground an excess fee may be applied to remove.

Measuring the diameter of the stump as shown above, we charge as low as \$2 per cm. Above example would cost \$84 for removal.
