RICHMONT  
TEA

*Our teas are uniquely created from the freshest and finest organic ingredients by our master blenders, capable of creating an insatiable temptation that even the fussiest tea connoisseurs among us could not resist. In addition to this, our tea is complimented by our innovative brewing and serving system that facilitates both the optimum infusion time for each type of tea as well as providing a convenient serving method – leading to an indulgent experience for all.*

*It is an established scientific fact that we forge impressions and create memories through the feeling experienced through the dominant senses (which in most is sight, smell and taste). Richmond Tea, with its delectable aroma and taste, coupled with the unique design of both our packaging and infusion system, will leave your guests with a lingering bliss that will only add to their pleasurable stay with you, thus forging a memory that will last a lifetime.*

organic

Our tea is enjoyed to perfection by using our innovative brewing and serving system.

More than just a cup, our unique concept is made from high quality porcelain that is strong and durable, able to resist breakages that would ordinarily arise from the simple knocks of day-to-day activity. Inherent in its shape, is the ability to keep your brew hot for longer than the average tea pot, providing an added convenience to your customers, should they wish to savor their Richmond experience that little bit longer.
