INX +BI
dashboards. analysis. reporting.

INX™

View meaningful data through personalised, easy-to-use, interactive dashboards for improved understanding and decision making.

From hours to seconds

Don't waste your time on building Excel reports, typing data and building tables. INX +BI does it all for you and is even smart enough to determine which chart is most suitable for the data you are dealing with.

A dashboard for you

No more 'one size fits all'. With INX +BI you can produce the graphs and layouts that you want in as many dashboards as you like.

Share and collaborate

Create your own dashboards and reports and share this with approved colleagues. We go beyond the traditional email and links and provide the tools that allow you to embed your reports into blogs, wikis and portals.

Comment and action

Review and respond to charts and information by adding your own comments and assigning tasks to people based on what you see directly from the dashboard.

Presentation mode

Use the storyboard tool to add images, videos, graphics and fully interactive reports to present data in a more powerful PowerPoint style to managers and in meetings.

Ready to go for INX

No more setting up charts, graphs and data sources. Data that is managed within INX is automatically filtered and pushed into your dashboards and reports for you to use right away.

Your out of office assistant

Out of the office or have a monthly report due? Not to worry. Use the schedule function to create reports and select who should receive it and when.

Minimal training, if any, required

Our team will set up your dashboards so they're ready to go. The intuitive design and layout will ensure you will be building your own reports and dashboards in minutes.

Improved decision making

Display all the key data vital to your operations in the one place. The drill-down functionality ensures you can find out exactly what is going on and why so you can identify trends and action change.

Mobile friendly

Not only are the dashboards cleanly displayed on your desktop but they are also mobile and tablet friendly through their responsive design.

Safe and secure

Fully integrated with INX role security, roles can also be set across dashboard consumers, designers and administrators.

Features to improve your experience

With search tools, private and public dashboards, branded reports, drag-and-drop functionality, filtering and over 50 visualisation types, INX +BI is sure to be the most simple to use and effective reporting tool to date.

"We wanted a solution that could adapt to the ever changing climates of our business. INX provided this along with providing greater transparency across the company"
