

TSS TOTALSURVEYING SOLUTIONS

COMPANY PROFILE

BUILD WITH A SOLID FOUNDATION

Total Surveying Solutions (TSS) is an experienced land surveying company. We are experienced in all aspects of the land-surveying field; from boundary & topographic surveys for engineering design; to construction layout and final as-built surveys.

Through experience, we have established efficient field procedures by investing in state-of-the art technology and applying results-proven survey methods. Our history of assisting a broad client base attests to our proficient, timely and cost effective service. TSS can also prepare all document records required for development, including subdivision, easement and extension plans.

We specialize in commercial and municipal development projects ranging from small restaurant sites to large campuses. Much of our experience has come from collaborating with engineering professionals. These partnerships have taught us how to provide a solid foundation for design professionals to conveniently and accurately generate drawings. Our thorough office drafting and a steadfast QC/QA process ensures accurate fieldwork.
