

Return to your home after it has been locked up on a hot summer day to find it free of heat, or wake on a cold winter morning to be warm and comfortable. This is the lifestyle you can enjoy with "The Insulation Man - Natural Cellulose Fibre Insulation".

A well insulated home is more energy efficient, you can save up to 40% on power costs, this helps protect your savings as well as the environment.

Natural Cellulose Fibre is a Safe, Effective, Non-Irritant Insulation manufactured from wood pulp fibre (recycled news print) permanently treated to render it totally Fire Resistant and Vermin Proof, is Allergy Free, and has a Lifetime Guarantee.

This type of insulation has a proven record over many years. First used in the USA in the 1940's where the unique insulating qualities were used to make electric heating economically viable. It is still the most popular domestic insulation in the United States and Canada today. Although relatively new to Queensland it has been used successfully in the southern states as well as New Zealand for a much longer period as well as many government housing projects.

Natural Cellulose Fibre achieves excellent performance due to its high resistance to heat, coupled with the fact that it can be installed without gaps. A recent government report stated that "5% gaps in ceiling insulation will reduce its effectiveness by up to 50%." Natural Cellulose Fibre is installed to form a complete barrier against the transfer of heat in your home. It simply works better and lasts longer.

Experience has shown that exposed beam and raked ceilings can be very hot in summer. Cellulose Fibre is the only effective insulation that can be installed into this type of roof without much difficulty. It is excellent for keeping outside noise from traffic or rain on a metal roof to a minimum.

Natural Cellulose Fibre is non-irritant, working in the ceiling is no problem and electrical wiring is easy to locate.

A number of experiments conducted under the supervision of fire prevention experts have shown this type of insulation is a far superior fire barrier and provided substantially more time for the occupants of a burning home to escape.

Guaranteed Tested, Manufactured and Installed to Australian Standards- AS 2462 -AS 2464 - AS 3999. The Insulation Man is a family owned company dedicated to value and customer service. An average home can be insulated in less than two hours with a minimum of fuss.
