tiny toes ballet

“To nurture and develop the creative potential of young children through the joy of dance”

Our classes have been developed to address young children's cognitive, motor and affective development. Using movement as the medium through which creativity, expression and musicality are developed.

Tiny Toes classes will help your child:

- Enhance their movement abilities and physical fitness
- Become physically and spatially aware
- Stimulate their listening skills
- Move expressively
- Build confidence and self-esteem
- Encourage your child to be co-operative and sociable

Our classes are themed to help engage the imaginations of the children and to stimulate their creativity and expression.
