

Sydney based sound system / audio engineer service with more than 10 years professional experiences in both live sound & studio environment. Most of the time the built-in audio system at the venue or cheap audio system may produce uneven coverage, poor clarity, random feedback, poor bass reproduction, harsh treble / high, humming / rolling low end and no one there to help or assist the sound system.

We are here to help you with all audio related issues during the events. **Hire us for your next events and bring the loudness, comfort and clarity to your audiences!**

What makes us so different from our competitors?

- **Audiophile System**, custom setup array speakers to match every event type for impeccable clarity and comfort to the audiences. Specifically tuned for speech, music or live performance.
