

ENGINEERING & HYDRAULICS PTY LTD

THERMAL ARC RECLAMATION ...

... extending the life of your machinery

Why Thermal Arc Spray?

- Repair wear areas
- Improve wear resistance or thermal conductivity
- Provide corrosion protection

What are the Benefits?

- Coatings can be applied fast and at low cost
- Sprayed metal is usually harder than the same metal in wrought form
- The surface being sprayed remains cool - no risk of heat distortion or metallurgical degradation
- Metal spraying is an ideal steel application in industrial, rural/agricultural and marine or coastal environments

Why Choose Us?

- ✓ We are Newcastle based
- ✓ Cost competitive
- ✓ Offer a quick turnaround
- ✓ Fully equipped machine shop
 - turning - 1350mm diameter to 5m long
 - vertical & horizontal boring to 10 tonne.
 - bed mill – 5mtr table travel

Other Services include – Machining - Overhaul & Manufacture of Hydraulic Cylinders - Fabrication & Welding – Sandblasting & Painting
- Pickup and delivery if required - 24/7 Breakdown Service
