PURPLE DATA

Maximising Opportunities and Resources

| Gathering Requirements | Analysing Opportunities | Evaluating Solutions | Maximising Results |

Consultancy, Training, Service Improvement, Data Management, Systems Support and Software Development.

Purple Data is a consultancy service focusing on strategic analysis and improvement of data quality, including optimisation and development of management systems.

Ana Zamora, founder of Purple Data, has over 10 years experience in IT support, software development, systems administration, strategic analysis and all facets of Government reporting specialising in the Community Aged and Disability Sectors and other not for profit organisations.

With impending Government changes to the sector; accurate, efficient systems and data examination are essential to the success of your organisation.

Purple Data Services include:

Data reporting
with a particular focus on the HACC MDS.

Client Management Systems
Upgrades, training
(e.g. HADS, TCM, Antares)

Process Design and Streamlining
Analysis, design and implementation of processes to improve services with particular emphasis on strategic use of IT.

Software Development
Customised database systems tailored to fit your exact requirements. (e.g. membership record system, employee timesheet, participant budgets).
