

## About us

The Environ story started in 2000, with ever increasing pressure from homeowners and builders to “clean up” the pest industry, a new benchmark had to be created. Integrity, honesty and peace of mind was just a starting point when providing services for our valued clients.

Core values aligned with environmental stewardship, quality services, public health and safety were major factors contributing to Environs’ continuing success.

*“Finally there is a better way”*

## Testimonials

Don't take our word for it, hear from our satisfied customers...

The man who came to our property had a cheerful, bright, easygoing attitude which is pleasant during a stressful time such as moving house. Being able to give a “time” for arrival instead of sometime from 9.00am – 5.00pm was great.

*Nicky Rogers*

From first contact the staff were very knowledgeable and happy to offer help and advice. Price was terrific; appointment was able to be made at a time suitable to me. I would rate my overall experience with Environ Pest Control as WOW factor!

*Ruth Clayton*

I chose Environ Pest Control because a friend recommended them and my boyfriend wanted someone who was environmentally conscious. What caught my attention was the friendly technician who was happy to answer questions.

*Linsay Becke*

Environ Pest Control was highly recommended by a friend. The service I received was FANTASTIC! Yes I would recommend this company to friends and colleagues, NO DOUBT ABOUT IT.

*Jan Piper*
