Reiki is a gentle technique that reduces stress and promotes healing and relaxation. It is a simple and safe holistic therapy that influences the body, mind, emotions and spirit. Reiki is grounded in the belief that life force energy flows within us all. When this life force energy is low, stress, illness and disease occur. Reiki works by improving this life force energy and bringing about a sense of peace and wellbeing and enhancing quality of life. You will remain fully clothed as this is usually a non-touch treatment where the reiki practitioner will gently place their hands on or near certain points of your body.
