drinks

about our coffee

we proudly use one of Jaspers' finest fairtrade organic coffees being the Peruvian exclusive release Café Femenino. This coffee is produced by the Café Femenino project which is a co-operative of now over 7,000 women. To join the project the women must own the land and participate in all farming activities, as well as harvesting, depulping, fermenting and drying the coffee.

The women of the co-operative are committed to improving the quality of their coffee, their lives and that of the communities that they live in and we are very happy to support this initiative.
