

# Adelaide Online Backup

## Protect your important business data with Solve IT All's Online Backup..

### Set and Forget!

Fully automated and checked by Solve IT All

### Fast Setup

Initial backup's are done on site and transferred to our server so they take hours, not weeks!

### Quick Recovery

Data can be recovered quickly in the event of a failure.

### Protect What Matters

Image or File backups are available.

## Protecting your business data is a smart investment

- Recovering data from a single hard drive can cost thousands of dollars.
- Crypto virus, ransom-ware and other attacks are getting smarter at taking out local backups.
- Many backups rely of staff remembering to do a backup.

## Backup your data with the company you trust

### We own the system

There is no third party access to your data. The entire backup system is owned and operated by us!

### Encryption

Advanced security options to protect anybody from accessing or reading your data - even us! Suitable for medical, financial and legal companies who require absolute confidentiality and data security.
