

Journey through Science

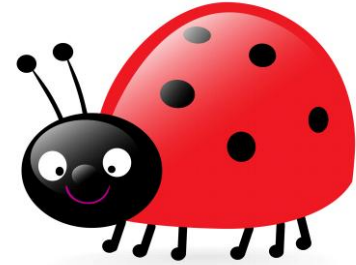

***What does our
show involve?***

First we take a look at the world of the dinosaurs...

But what will the children be learning about?

We have structured our educational performance around the following questions!

- ✓ ***When did the dinosaurs roam the earth?***
- ✓ ***What age did they live in?***
- ✓ ***What are the names of some of the most common dinosaurs?***
- ✓ ***What are their main features?***
- ✓ ***How big were they?***
- ✓ ***What did they eat?***
- ✓ ***What happened to the dinosaurs?***
- ✓ ***What is a fossil?***
- ✓ ***How do archaeologists dig for fossils?***

We then take them on a journey to the Pacific Ring of Fire to look at the mysteries surrounding the Volcano

What exactly is it about volcanoes that they will be learning?

- ✓ What is a volcano?
- ✓ What happens when a volcano erupts?
- ✓ What is lava?
- ✓ Why is lava so hot?
- ✓ What does a volcano eruption look like? (Simulated with our model volcano)
- ✓ Where are volcanoes found?

We aim to provoke each child to question the world around them while having lots of fun!

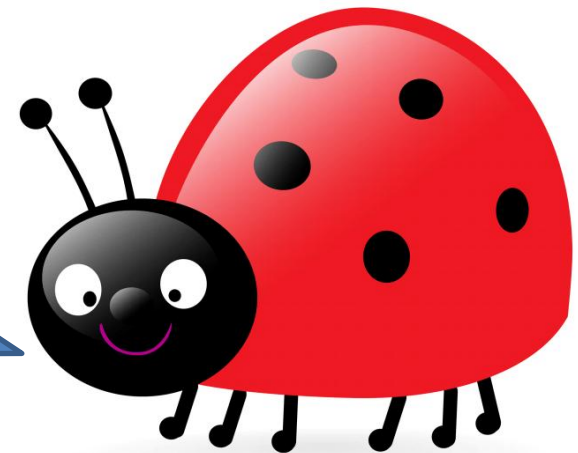

Last but not least, we challenge each child to question the vastness of our Solar System as they journey into outer space

What will they be learning about space?

- ✓ What is a planet?
- ✓ What are the names of the planets in our Solar System?
- ✓ How many planets are in our Solar System?
- ✓ What is the sun?
- ✓ Why is the sun so important to us?
- ✓ Why do people and objects float in space?
- ✓ What is a star?
- ✓ How long does it take to get to the moon?

We aim to use a variety of different teaching strategies to engage children in the exciting process of developing their knowledge of the world of science.

What teaching strategies do we aim to employ?

As each child's learning style is so unique, we feel that it is important to use a wide variety of methods to engage them in their discovery of the world around them.

REMEMBER: Our aim is to provide early childhood centres with the highest quality educational entertainment, so your voice is extremely important- We are serving you and we would love to know what it is that you would like to see! Your ideas and feedback are greatly appreciated- it will help us to deliver more of what you want in order to make the learning process as positive and enriching as possible for young developing minds.

Our quest is to provide an exciting and enriching learning environment through using:

- ✓ Songs and simple dance movements to create an atmosphere of fun and joy
- ✓ Student-centred interactive activities that encourage individual exploration
- ✓ Costumes and props that will stimulate curiosity and maintain focus and attention
- ✓ Maintaining an appropriate pace that will sustain interest
- ✓ Technology to create engaging visuals and audio to aid transmission of key knowledge
- ✓ Stimulating colours and graphics to help solidify understanding of more complex concepts
