**UNDERGROUND SERVICES**

**Underground utility locating & mapping, leak detection & industrial services**

---

# What We Do

## At SureSearch, we can see what others can't.

Our range of advanced equipment, controlled by our expert technicians, enable you to see deep into the ground, and investigate all types of sites and structures, to identify underground utilities, leaks, reinforcement and safely map the location of pipes and cabling as well as condition and pipeline maintenance of drainage networks.

We can also assist when planning structural support and mapping spaces, to identify areas of structural deficiency and ideal utilities placement.

Whether you're looking to detect a leak or blockage, or you need to plan where safely to locate piping, cabling or utilities, we've got the tools and the expertise to guide you.

Protecting your site is our priority; ensuring accuracy is our promise.

SureSearch Utility Locating and Leak Detection was established back in June 1987, and was the first independent pipe, cable and leak detection company in Sydney. Maintaining our place as Sydney's experts in leak detection and underground utility locating & management has remained our goal ever since.

At SureSearch underground services we pride ourselves on using the most technologically advanced equipment. We can pinpoint exact locations of existing underground utilities, water leaks, blockages, defects, underground tanks and reinforcement, thereby saving you time and money on costly repair bills.

# Our Solutions

**SureSearch has built a reputation for accuracy and safety when it comes to locating, mapping or excavating. These are some of the services we've become known for, but we're also happy to discuss unique projects also:**

## **Underground Utility Locating & Mapping**

SureSearch views its Underground Utility Locating & Mapping service as a leader in the industry, this is achieved by maintaining highly trained staff and using the most advanced and up to date equipment available. We can accurately locate and map the physical location of existing underground utilities using a combination of Electromagnetic Locating technics, Ground Penetrating radar and many other tools, our statement is "BE SURE USE SURESEARCH"

## **Safe Excavation**

With pinpoint accuracy SureSearch Non- Destructive Vacuum & Hydro Excavation services can excavate around or near underground utilities without any damage to the environment or existing infrastructure. The method used is high-pressured water or compressed air combined with vacuum this allows Safe exposure of underground utilities (potholes/Slit trenches), Removal of rail ballast, Excavation of power and street light poles, Excavation around Tree roots and Pole/ Post hole digging

## **Concrete X-Ray**

Ground Penetrating Radar Concrete (GPRC) is used for the surveying of concrete slabs and walls to locate pre & post Tension cables including structural reinforcement and services prior to Core hole drilling, Cutting & Removal of slabs and Structural investigation.

## **Pipeline Cleaning & CCTV Inspection**

SureSearch prides its self on providing a professional service for the drain inspection and maintenance industry by providing quality equipment and staff to successfully complete projects for pipeline industries including councils, government organisations, plumbing and civil. Our services include CCTV inspection and assessment of drainage systems and networks, Gross Pollutant Trap & Man Hole cleaning and Cleaning of council domestic government sewer and stormwater drains.

## **Leak Detection**

Identifying the source of a leak and tracing the location or damage is key to maintaining efficient and effective pipes, while limiting structural damage, water loss and unnecessary costs. SureSearch uses a range of proven methods to identify the location and cause of the leak, as well as to remedy the problem.

# Be Sure, Call SureSearch:

- ✓ Locate before you excavate
- ✓ prior to building or renovating
- ✓ before you dig yourself into trouble
- ✓ when your pipes are leaking
- ✓ to see what others can't see
