

Australian Toughened Glass

At WA Techno Glass Constructions we offer a myriad of glass solutions for your custom requirements. We import stock panels and fittings, which are stored in our warehouse. They are available for immediate fitting and best suit the budget conscious fencer.

Our float glass is manufactured in Australia by CSR/Veridian. It is cut to size and shaped using our in-house CNC machine so if you are after an all Australian made product this solution may appeal to you.

Contact us for all your glass requirements. We can tailor a solution to your needs, regardless of how big or small.

We offer DIY or fully installed options. You decide.
