

## 5 Ways to Save on Parcel Deliveries

**Here are some tips on saving time and money with your parcel deliveries.**

### **1. Packing your Goods**

The smaller and lighter the shipment, the less you pay. Most carriers charge by weight and dimensions, so choose a box to suit the size of your item.

### **2. Express or Saver?**

How quickly do you need it to arrive? If you can spare a couple of days, and ship it on a slower service, you can save even more.

### **3. Right Delivery Address**

Incorrect addresses cause the carriers major problems. They may also charge for re-delivery attempts, so getting the address right first time is essential.

### **4. Out of area Surcharge**

Do you know where your customers are? You may be delivering to a major country, but if your customer is in a ski resort in that country you may be charged an out of area surcharge. Your InXpress consultant can check which carrier covers these areas as a standard delivery area.

### **5. Insurance**

If it all goes wrong then taking additional insurance can be a life saver. Most carriers offer standard liability insurance for free, for a limited amount of cover. If you need additional cover contact your InXpress consultant, who will check the minimum charges and your excess charge on a claim.

**Whatever you need to ship to anywhere in the world, contact us today to save the most time and money.**
