SAFETY & STANDARDS

Health and Safety

SWEL is dedicated to the health, safety and well-being of its staff and its clients. We provide a motivated and qualified team of trades people while ensuring that all OH&S regulations and standards are not only met, but often exceeded.

The workshop processes we have in place and the regular testing of all our machinery ensure that we maintain the highest of safety standards in all that we do. Annual audits are conducted to ensure our practices and processes are constantly being improved.

Committed to ISO's

SWEL is committed to achieving the International Quality Standards in order to provide our clients with the best possible service to the highest standards. We are currently working towards the following ISO Certifications:

- ISO 4801 – Health and safety
- ISO 14001 – Environment
- ISO 9001 – Quality Assurance

WE MAINTAIN THE HIGHEST OF SAFETY STANDARDS IN ALL THAT WE DO.

SWEL Clients

SWEL has worked with a range of clients to date including maintenance contracts for civil and local government providing ongoing maintenance for hospitals, schools, hotels, national parks and shopping centres. Likewise, we also service the larger resource companies with ongoing maintenance and fabrications as well as smaller one-off jobs for individual owner/operators. Our clients include:

- Santos
- APA Group
- Power Water Remote Generation
- AECOM Pty Ltd
- Laing O'Rourke
- Tri-Star Petroleum
- Satcom Technologies
- Yeperenye Shopping Centre
- Chambers Engineering
- Ostoic

Welding & Engineering to Exacting standards

Specialised Welding & Engineering (SWEL) offers clients a comprehensive range of welding and engineering services to exacting standards from 650m² of dedicated workshop space, including a dedicated paint bay, at premises located in the heart of Alice Springs' industrial area.

- Repairs and maintenance to plant and equipment
- Maintenance contracts & shut-downs
- Fuel tank restoration and fuel filtration
- Sand blasting and painting
- Coded welding for pressure pipe and plate
- Fabrication & engineering
- Welding inspections
- Labour hire

Our coded welding and certified inspection qualifications ensure that we are uniquely positioned in the region to provide clients with an end-to-end range of welding and engineering services to the highest of standards.

Maintenance Contracts

Our maintenance services are utilised by clients both in and around Alice Springs and in further remote areas of NT and interstate. Our fully equipped SWEL truck means we can come to you, wherever you are to provide ongoing maintenance when and where you need it. Our maintenance contracts are designed around our client's requirements giving them the peace of mind that their plant and equipment will remain well-maintained and reducing down-time.

Customer Focus

Our most important asset is our clients, which is why our company mission is to provide them with a professional and friendly service based on honesty, quality workmanship and customer focus. Our aim is to establish long-term working relationships with our clients by exceeding their expectations at every stage of the service delivery process.

Exacting Quality

SWEL is dedicated to providing clients with consistently high standards and in many cases exceeding their expectations in relation to quality, reliability and customer service. Our commitment to achieving the highest management standards by the continuous improvement of processes, systems and skills of company personnel is demonstrated through our quality policy which includes the following goals:

- Ensuring compliance with AS/NZS ISO 9001;
- To provide quality of service above and beyond our customer's needs;
- To be an employer of choice through recruitment, development and retention of skilled personnel, and
- To be regarded as an industry leader in the fabrication and welding industry.

OUR BUSINESS IS FOUNDED ON PROVIDING A PROFESSIONAL AND FRIENDLY SERVICE THROUGH HONESTY, QUALITY WORKMANSHIP AND CUSTOMER FOCUS

SERVICES

BASED IN THE HEART OF ALICE SPRINGS, SWEL OFFER CLIENTS A SUPERIOR SPECIALISED CODED WELDING AND ENGINEERING SERVICES.

Coded Welding

Our coded welding certification means we can undertake work in light structural steel. We are also competent and experienced in more sophisticated welding to Class 1 standards. Offering clients peace of mind and competent quality welds – every time. Our welders are qualified to your specific weld procedure.

Certified Welding Inspections

Our end-to-end welding services also include independent welding inspections. Using the latest testing applications, including die-penetrate and magnetic particle non-destructive testing, we can identify weld imperfections which need to be rectified to ensure structural safety. Our senior certified welding inspectors can produce a PQR and WPS for clients' specific requirements.

SWEL Inspector Certifications:

- CWI – Certified Welding Inspector
- IIW International Welding Specialist
- IWS Welding Supervisor AS 1796 Certificate 10 – Boiler and Pressure Vessels
- IWS Welding Supervisor AS 2214 – Steel Structures
- IWI S International Welding Inspection Senior

THE ONLY 'AS' CERTIFIED WELDING INSPECTOR AND WELDING SUPERVISOR IN ALICE SPRINGS.

Welding and Cutting

SWEL offer a range of welding services including Mig, Tig, Stick and Flux core for all non-ferrous steels, stainless steels and low and high carbon steels. We use a range of cutting techniques plasma, guillotine, air arc-gauging, cold and oxy cutting.

Repairs and Maintenance

SWEL can also carry out all your general maintenance requirements, including repairs for your plant and equipment or providing labour hire.

Fabrication and Engineering

Our extensive fabrication experience and expertise means we can design, draft and manufacture a wide range of steel-based products to fit exact requirements, such as:

Bollards	Ladders	Stairs
Platforms	Walkovers	Guard rails
Cattle grids	Bins	Benches
Hand rails	Towbars	Fuel tanks
Shelters	Mezzanine floors	and much more

Sand blast and Paint

Sandblasting and painting includes all classes and surface finishes.

Fuel Tank Restoration

Our fuel tank restoration services include de-gassing and fuel polishing to 2 microns using an aviation filter system as well as the general cleaning of internal and external tanks using line flushing where applicable.

CAPABILITIES & CERTIFICATION

Extensive Capabilities

The SWEL workshop is well equipped to undertake smaller jobs and larger commissions for both commercial and government clients. Whether it's the welding of a piping system, the fabrication of platforms, repairs to earth moving equipment or the installation of a generator, our experience and expertise guarantee a professional service of the highest quality.

OUR FULLY-EQUIPPED SWEL TRUCK FURTHER EXTENDS OUR RANGE OF CAPABILITIES ALLOWING US TO TAILOR OUR SERVICES TO OUR CLIENTS' NEEDS.

OUR FLAT-BED TRUCK IS FITTED WITH A 'UNIC' ROPE CRANE WHICH HAS AN EXTENSION OF UP TO 30M.

Remote Services

Our fully-equipped SWEL truck and range of 4WD vehicles means we can come to you. Whether it's to pick up or drop off product or on-site welding services in remote areas, our off-road vehicles extends our range of capabilities allowing us to tailor our services to our client needs. We regularly service clients in remote areas of NT, SA, QLD and WA.
