

Pipelining "NO DIG" Trenchless Rehabilitation Technology

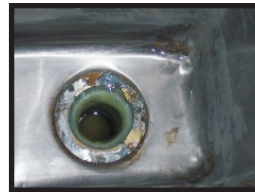

DRAIN SOLUTIONS uses a cost effective *Pipelining "NO DIG" Trenchless Rehabilitation Technology* solution to replace damaged or cracked pipelines and root intrusion to sewer or stormwater pipelines without disruptive excavation or damage to property.

**DAMAGED PIPE
 BEFORE PIPELINING**

**DAMAGED PIPE AFTER
 BEING PIPELINED**

**PIPELINED 50MM
 BRASS TRAP TO URINAL**

**DRAIN SOLUTIONS
 ROBOTIC LATERAL CUTTER**

DRAIN SOLUTIONS imports and uses high quality Liner, Resin, Pipe Lining materials and equipment from the USA and Europe to re-line deteriorated or damaged pipes. We were trained to use this technology in the USA and Europe.

Liner Seals Broken Area in Clay Pipe Creating a 100% Seal & Making Pipe Water Tight

Liner Bridging Broken Section of Clay Pipe Creating a 100% Seal & Making Pipe Water Tight

Cast & PVC Pipe with Hole & Liner Bridging Broken Sections

Pipe systems are often inaccessible - in walls or under floors, gardens, concrete or paving. By re-lining pipes, excavation and damage to property is unnecessary and can be completed with minimal interference to the customer.

DRAIN SOLUTIONS Pipe Lining system can be applied to:

- 💧 Pipes from 50mm to 300mm
- 💧 Spot Repairs to the Damaged Area of the Pipe
- 💧 Installing a Liner Along the Entire Length of Pipe
- 💧 Stormwater Pipes
- 💧 Sewer Pipes
- 💧 Pool Lines
- 💧 Pipes Under Houses
- 💧 Down Pipes in Inaccessible Locations
- 💧 Multi Storey Buildings
- 💧 Boundary Traps and Pipes with Multiple Bends
