Proud as punch!

Rhiannon is in year 9 and her parents noticed she was having trouble understanding many of the concepts being covered in class. They decided to seek advice from the qualified teachers at the Kip McGrath Education Centre in Burpengary. Russell (Director and Tutor) conducted a free assessment, working with Rhiannon on various maths activities to determine her strengths and exactly where her 'gaps' were.

An individual maths program was designed specifically for Rhiannon. This included 'one on one' tutoring, hands on materials, written maths activities, Kip McGrath computer programs and specific revision homework each week. "She no longer dreads maths – instead she looks forward to the challenges that are presented and tackles each task with a new found pride and confidence," says Rhiannon's mum Karin.

She had always worked hard in her maths lessons at school, but since being enrolled with Kip McGrath, her mother said, "she has not only achieved dramatic results with her end of term report card, but also with her ability to apply herself to her school work".

Rhiannon experienced success from her very first lesson. She studied in the relaxed, supportive and professional atmosphere at Kip McGrath Burpengary once a week after school for two terms, continually building her maths understanding and confidence.

Rhiannon was so proud of her achievements when she graduated from Kip McGrath. She went from 'D' on her school report to proudly achieving a 'B'! Her mother said, "I wish to thank Russell and Karen for their sincerity and dedication and for providing access to tools and techniques needed for my child's development. We have found the Burpengary Centre accessible, affordable and approachable. We have recommended Kip McGrath to friends and family and will likely be back for more tuition in future years."
