

# Chemical Bulk Storage Services & Logistics

OEG Offshore provide state-of-the-art facilities and large-scale capacity to service customer's bulk liquid storage, transport and transfer needs efficiently, safely and cost-effectively. The focus is on quality and continual monitoring to ensure compliance with industry safety and environmental standards. Operations are certified to ISO 9001:2008, ISO 14001:2004 and AS/NZS 4801:2001 & OHSAS 18001:2007.

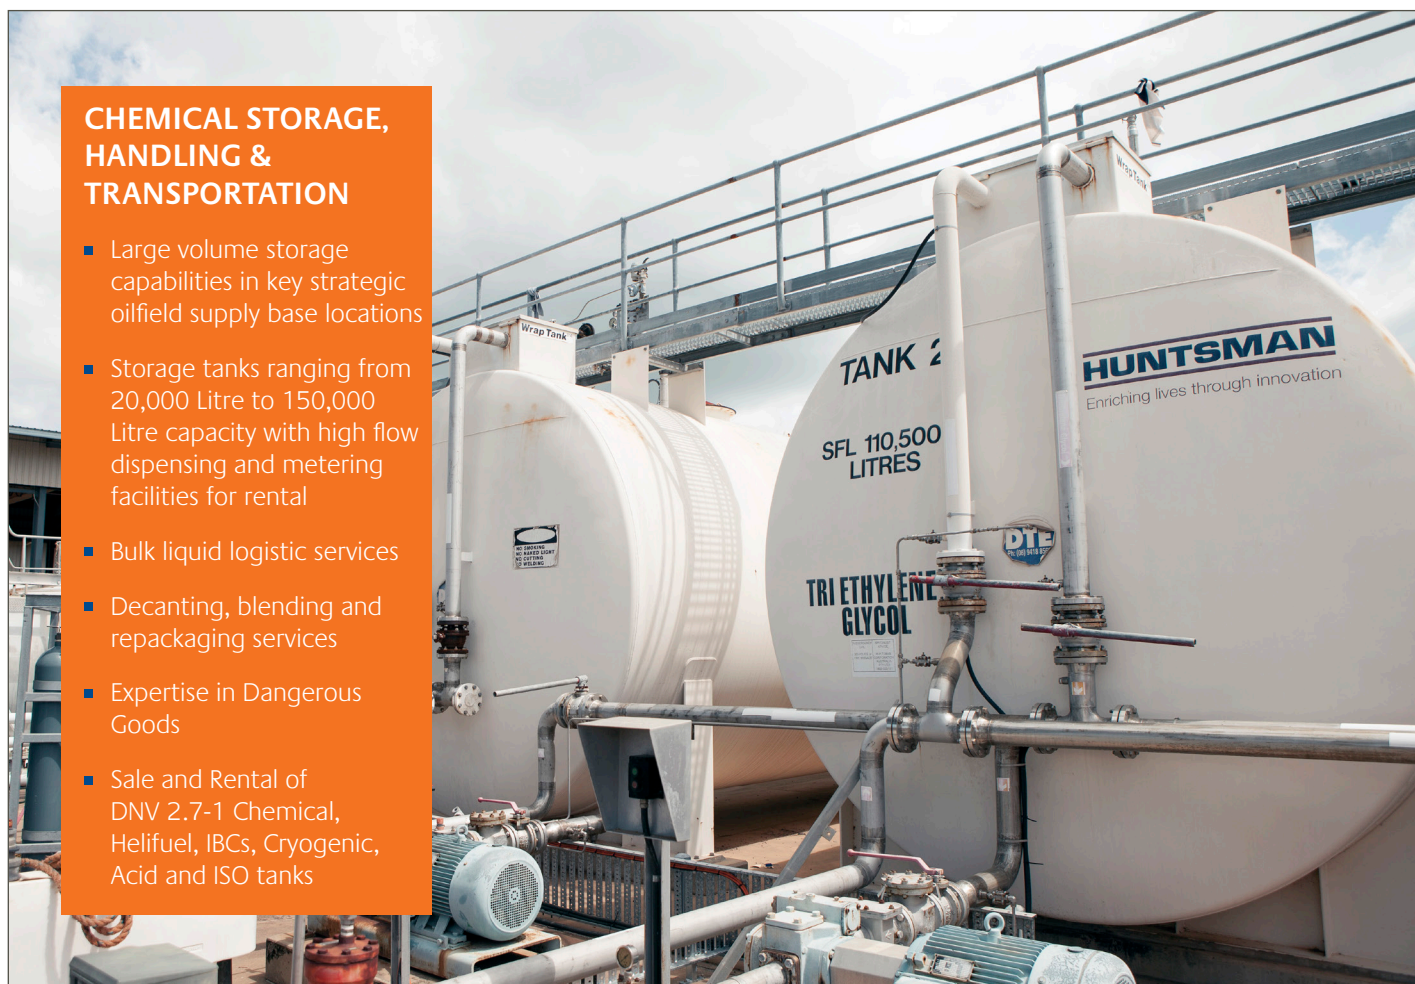

Facilities include:

- 4 x 100,000 Litre self bunded tanks
- 4 x 150,000 Litre bunded tanks
- Bottom Load Dispensing Systems
- Calibrated meters
- Scully Overfill Protection systems
- Transport - Road / Rail / Sea
- Compliant dangerous goods facility available for lease / hire
- Compliant storage and distribution services available from yard
- Onshore bulk storage, handling and dispensing of Jet A-1 fuel

## CHEMICAL STORAGE, HANDLING & TRANSPORTATION

- Large volume storage capabilities in key strategic oilfield supply base locations
- Storage tanks ranging from 20,000 Litre to 150,000 Litre capacity with high flow dispensing and metering facilities for rental
- Bulk liquid logistic services
- Decanting, blending and repackaging services
- Expertise in Dangerous Goods
- Sale and Rental of DNV 2.7-1 Chemical, Helifuel, IBCs, Cryogenic, Acid and ISO tanks

# Pumping & Filtration Packages

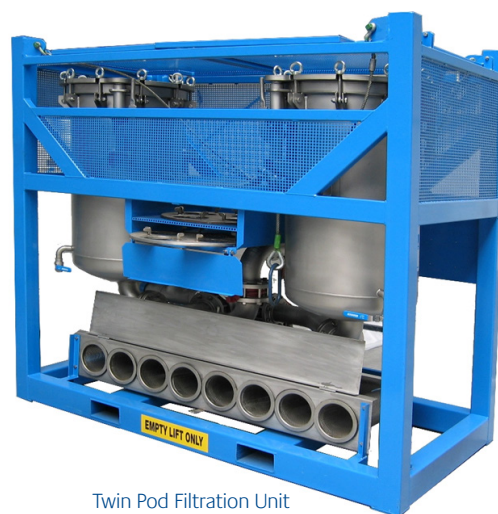

OEG Offshore offer a broad range of pumps and filtration systems for sale and rental to support offshore oil and gas production operations.

## Filtration Units

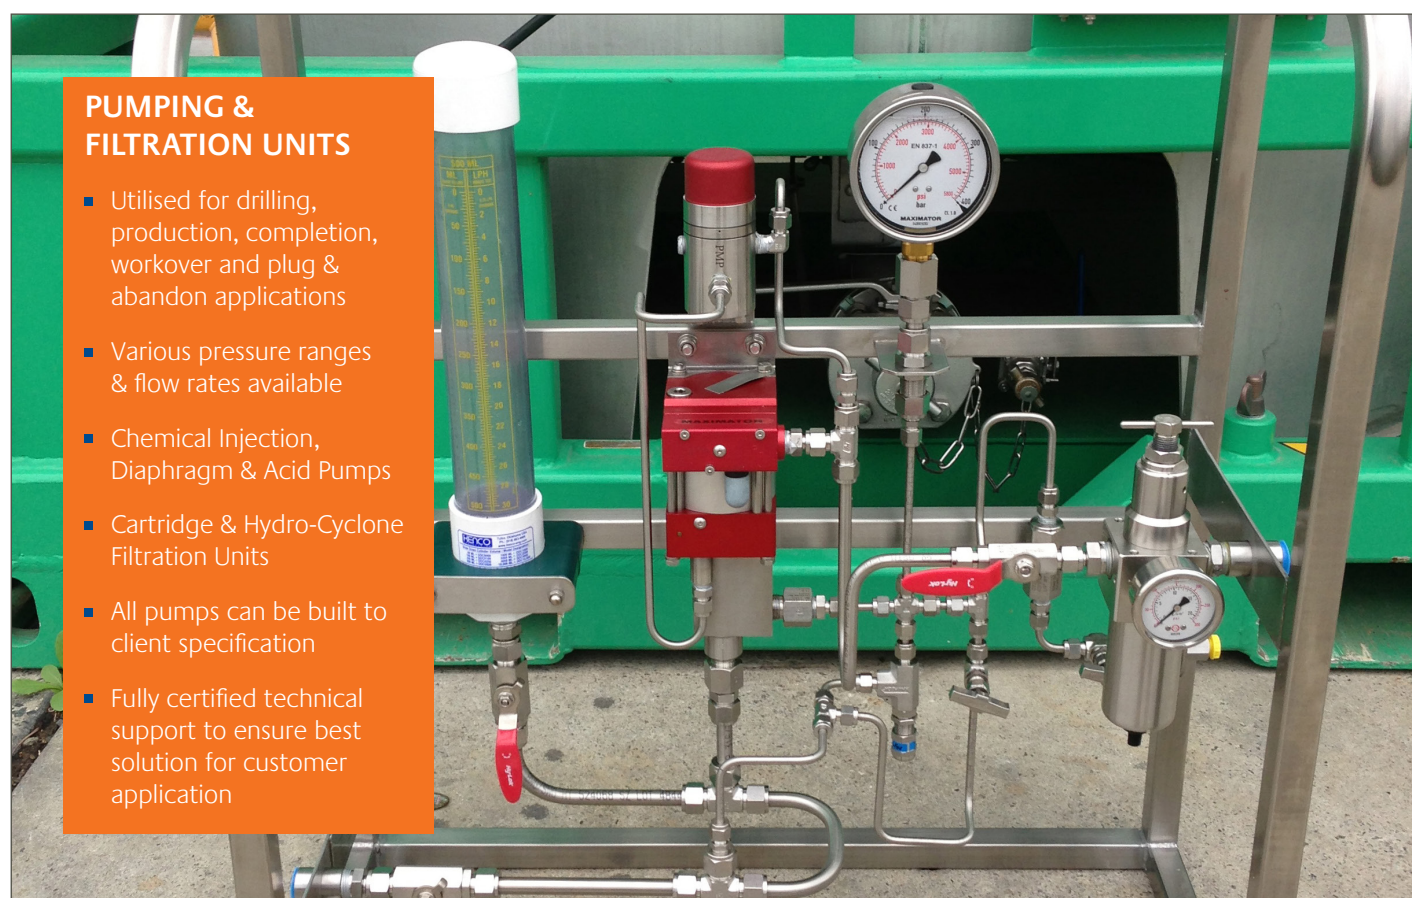

They are specifically designed for the filtration of solids from chemicals and fluids during offshore operations. These include well completion fluids, brines, gravel pack fluids, glycol, amines, diesel, workover fluids, acids, bilge water, produced water, seawater and stimulation fluids. Our fleet of stand alone or integrated filtration solutions significantly reduce the cost of solid waste removal.

## Pumping Packages

Chemical Injection and Diaphragm pumps can be supplied as stand alone or part of an integrated solution. Skid mounted pump units are available for onshore and offshore applications.

Twin Pod Filtration Unit

### PUMPING & FILTRATION UNITS

- Utilised for drilling, production, completion, workover and plug & abandon applications
- Various pressure ranges & flow rates available
- Chemical Injection, Diaphragm & Acid Pumps
- Cartridge & Hydro-Cyclone Filtration Units
- All pumps can be built to client specification
- Fully certified technical support to ensure best solution for customer application
