Too Slow

JetOz - The New Name in Jet Hand Dryers Technology

Features:

Drying time 5~7 Seconds

Wind speed 342kph

➤ **Infrared sensors: non-contact drying, clean & sanitary**

One sensor located at the bottom of the open mouth which fully detects inserted hands and initiates the airflow. Another sensor located at the top of the open mouth can sense when hands withdraw, automatically stopping the airflow. Hands don't touch any part of the unit.

Start detection sensor is installed at the bottom of the dryer.

➤ **Brushless DC motor: 7 year * 1000 times / day long life**

Equipped with a DC brushless motor, no more problems with wear and tear on motor brushes, paves the way for truly efficient power and stable operation for the long term

■ Brushless DC motor

Contact-free rotor eliminates wear and tear.
