

## About Us

SPN Consulting is an engineering consultancy working predominantly in the processing industry, offering a unique blend of industry experiences and technical services that help our clients achieve their goals.

The team at SPN Consulting is able to work with our customers to design new processes that effectively integrate with current infrastructure as well as improve upon existing processes in the manufacturing and B2B sectors.

*Our business model is based on Engineering, Procurement and Construction Management (EPCM) whereby we carry out projects from conceptual designs to commissioning where we can hand over turnkey projects to our clients or work on isolated systems.*
