

# Footwear Sizing Guide

## CHOOSING THE CORRECT SIZE SAFETY BOOT

Although most of us are familiar with our shoe size, sizes differ between brands and style. It is important that you read these instructions to ensure your **Rollins Work Boots** are comfortable to wear.

## HOW TO MEASURE YOUR FOOT LENGTH

Measuring your feet at home is easy and done by tracing the feet and measuring the length of each foot. In order to get the most accurate figures you will need paper, a pencil and ruler. Trace feet in the evening, after the feet have swollen to their maximum size wearing the socks that will normally be worn with the boots.

## TRACING YOUR FEET

- Place one foot on the paper and allow it to rest naturally
- Holding the pencil perfectly vertically and perpendicular to the paper, trace around the perimeter of the foot as closely as possible without angling the pencil. It is not necessary to draw the outline of each toe; the longest toe is of primary concern
- Using the ruler, measure the distance from the very bottom of the heel to the top of the longest toe. Record this measurement
- Repeat these steps with the other foot. Remember, one is likely to be marginally larger.

### ROLLINS WORK BOOTS & SHOES

MEN - AU	3	4	5	6	7	8	9	10	11	12	13
MEN - UK	3	4	5	6	7	8	9	10	11	12	13
MEN - EUR	37	38	39	40	41	42	43	44	45	46	47
MEN - US	4	5	6	7	8	9	10	11	12	13	14

---

Maximum Foot length* (mm)	222.5	230	237.5	245	252.5	260	267.5	275	282.5	290	297.5
Width				85mm	88mm	90mm	92m	95mm	98mm	100mm	102mm

WOMEN – AU	5	6	7	8	9	10	11
------------	---	---	---	---	---	----	----

\* This is the recommended maximum foot size to ensure a comfortable fit when wearing Rollins Boots. Our sizing allows 10mm from longest toe to steel cap while wearing work socks (Thick Work Socks). Exact innersole dimensions are 15mm longer than those listed above.

## I HAVE ONE FOOT BIGGER THAN THE OTHER?

Most people have one foot larger than the other. When choosing your size it's always important to cater for your largest foot. Inner soles and heel grips can be used very effectively inside the shoe containing your smaller foot when there is a significant size difference.

## I'M A 7½ BUT ROLLINS BOOTS DON'T COME IN HALF SIZES, WHICH SIZE DO I CHOOSE?

Generally speaking a size 8 would be the best choice. Strictly speaking, ½ sizes are the same length, but, the ½ size indicates the sole is a wide fit.

## WHAT IF I HAVE WIDE OR NARROW FEET?

**Rollins Boots** come in standard width fittings, so if you have a very wide feet you may want to consider going up a size. Alternatively if you have very narrow feet you may require an innersole and / or heel grips to achieve a comfortable fit.

If you are unhappy with the fit of your purchase, you may exchange it for a different size or style, subject to availability and in accordance with our exchange policy.
