

The RESULTS

“Dust mites are a major cause of respiratory and skin allergies. We host millions of these in our bedding along with infections and moulds. In the Australian climate mould causes huge problems. The complete cleaning system provided by MattressKleen is the safe and effective way of dealing with these problems.”

Pauline Rose

Complimentary & Environmental Medicine. Sydney

“I have Asthma as well as allergies and sleep apnea and use many therapies to help these. After hearing of the benefits of mattress cleaning I contacted MattressKleen and they did a test to show me the level of dust mite faeces in my mattress, they sanitized the mattress and that night and I had the best sleep in ages. I am now feeling more rejuvenated and my sinus problems are not a factor.”

Mark F, Newtown

“After spending the last 5 years thinking I had a sleep disorder, I was impressed with the result of having a real solid night's sleep after the MattressKleen treatment. My allergies to dust mites appeared to vanish 'overnight'. A very prompt and professional company to deal with.”

Glenn. S, Perth

“I had been told about the amount of dust and dust mites that constantly build up in mattresses. I was shocked when I saw what came out of my own mattress. I used to wake up in the early hours not being able to breathe through a blocked nose. After having my mattress cleaned by MattressKleen I realised I had been affected by the dust mites and their excrement in my mattress. Now my sleeping is not being disturbed by breathing problems.”

Carol. L. Palmdale

“Your system works and works well, after many months I still have the benefits of your system and really appreciate the improvement in my Asthma management and my general health – from something so simple – Thank you.”

Scott Mc., Willoughby

“Itchy watery eyes are a thing of the past. Before having my bed done I was always waking up with watery eyes and a runny nose. Now I wake up feeling great. The real test came on a recent holiday. After two days in a resort bed, my watery eyes and runny nose returned. I couldn't wait to get back to my own bed and a good night's sleep. Thank you – I will definitely be having my bed cleaned on a regular basis.”

Mary J. Salamander Bay

Facts about dust mites

- There can be up to a million dust mites in one double mattress.
- Dust mite droppings contain powerful enzymes, which when breathed in breaks down the protective lining of our lungs, nasal passages and eyes.
- Australian research has revealed that 85% of people with asthma are allergic to the house dust mite.
- Allergy to dust mites is the 6th most serious sickness in the world (World Health Organisation, 1995)
- 25% of all allergies are due to dust mites.
- Lifespan of 60–150 days, during which the female lays 300 eggs.
- Dust mite population is high in coastal areas of Australia.
- 90% of dust mites are located in the mattress as that is where their food source of dead skin exists.
- Dust mites are microscopic, up to 300 can fit on a match-head.

The MattressKleen system kills and removes dust mites, their excrement, your dead skin, allergens, virus, bacteria and mould spores at an AFFORDABLE COST. Importantly the process is dry, non-toxic and chemical free.

CALL 1300 367 004 NOW FOR A QUOTATION AND BE PLEASANTLY SURPRISED.

Without doubt the DIRTIEST item in your home is the MATTRESS!

Infestation is in every mattress

We sanitise and deodorise

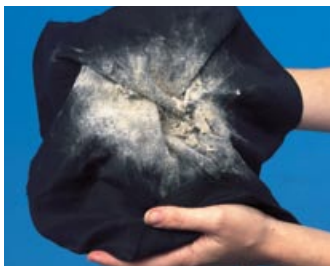

Our process is dry, chemical-free

Why clean the mattress?

Day after day, year after year, dead skin settles in your bed providing the ideal breeding ground for viruses, mould spores, fungi and especially dust mites. No matter how houseproud you are, the fact is you are sharing your bed with millions of dust mites greedily feasting on your dead skin.

A free test can be scary!

Dust mites excrete nearly twice their body weight each day and we react to a chemical called 'Guanine' which is found in their excrement triggering Asthma and other allergic reactions.

If you are suffering from any of these symptoms you are probably reacting to dust mites. If you are not, then there is a chance that prolonged exposure to their excrement can cause allergic reactions to begin.

- Asthma
- Hay fever
- Eczema
- Sinus symptoms
- Poor sleep
- Headaches
- Itchy or watery eyes
- Depression
- Sneezing
- Fatigue

Dust mites in your face

Dust mites are microscopic, you can get 300 on a match head. When you move on the mattress it acts like a bellows

and puffs up particles containing Guanine which easily pass through protectors and bedding to land on your face and skin.

It is a scientific fact that exposure to the allergen Guanine found in dust mite excrement is directly responsible

for numerous allergic reactions. Asthma is increasing at an alarming rate amongst children and is one of the ailments that are triggered by the chemical Guanine.

You never sleep alone!

The Solution

MattressKleen is a unique system specially designed to sanitise your mattresses. We provide a professional and an economical service that is dry, non-toxic and chemical free. Our high powered vacuum unit generates high frequency waves that agitate and penetrate to a depth in the mattress so that all particles including dust mites and importantly, their excrement and dead skin flakes are removed.

Simultaneously, attached to the vacuum unit, is a UVC germicide light that kills dust mites and anything living as well as viruses, bacteria and mould spores.

The service is completed with a fragrant sanitising spray, neutralising odour and the bed can be made just minutes after. Your mattress is left in a hygienic state as we sanitise both sides: and as fresh as the day it was purchased.

This environmental friendly cleaning process is speedy and is harmless to both people and mattresses, in fact it can extend the life of your mattress.

**UNIQUE
AFFORDABLE
SERVICE**

The FREE test

Don't spend another night sleeping on an infested mattress!

We are happy to make an appointment to do a no obligation, free test on your mattress and display the level of contamination that is present: the decision to proceed will be left up to you.

The cost of protection

Our rates are surprisingly low, especially as we can offer a household discount for all the mattresses in your home.

Ring now and be pleasantly surprised at the small price you pay for the elimination of allergens that could be compromising your family's health – or just the peace of mind of sleeping on a fresh sanitised mattress.

Your family's health

Night after night you shed microscopic particles of dead skin which combined with your perspiration in a warm environment provides the ideal breeding ground for dust mites. They are attracted to the mattress as it is their food source; in fact 90% of dust mites in the household are in your mattress.

If you have a child or pet that has soiled the mattress we can eliminate any bacteria and mould that may have formed and deodorize with our non toxic spray. Even a new mattress can quickly become one of the dirtiest items in the home.
