## Thinking of installing Hot Water Systems?

Fawcett Plumbing and Gas can help. Below are different brands of Hot Water Systems.

### RHEEM

Designed and manufactured in accordance with Australian Standards, Rheem builds quality products trusted for reliable performance in all Australian conditions.

### DUX

Over the last 5 years Dux has completely reinvented itself from a manufacturer of old electric water heaters to a world leader in the development of solar and heat pump technology.

### QUANTUM ECO HOT WATER

Heating hot water accounts for up to 30% of the average homes energy bill. This makes producing hot water the largest source of greenhouse gas emissions in the home. Installing a Quantum heat pump will reduce the amount of greenhouse gas emission and reduce your cost to produce hot water by up to 75% when compared to other hot water systems.
