The Manual tattoo method is an innovative technique tattooing thin hair strokes and adding shadows to create the most natural looking eye brows.

The procedure is applied using a handheld pen like tool with sterile disposable needle tip.

The application is done by hand using the pen and pigments to create the desired shape, colour and volume of eye brows.

The manual tattoo method is quite different to machine tattoo in that:

- It won't penetrate the skin as deep or last as long as machine tattooing,
- Depending on how your skin takes to the pigment it can last 2 to 4 years or a week to several months
- It is far more natural looking than machine work and the strokes look like natural hair strokes.
- The manual method is least traumatic for the skin
- The hand held pen tool will not cause vibration

On your approval of this method you will be asked to make a commitment to the process which will involve an initial consultation, the brow tattooing procedure and a Brow re do after one to two months' time depending on how your skin takes to the process.

- You cannot get your eyebrows wet at all for a week after treatment
- When itching and scabs appear please avoid picking or scratching the area as this will cause the loss of the brow work.
- Vaseline is to be worn day and night for the first 3 days followed by my healing gel for one week day and night, (can be purchased for \$5.00 dollars)
- SPF sunblock must be worn in sunlight as this will affect the pigment causing it to lighten or change the colour of the hair.
- Avoid facial treatments peels, exfoliation, masks for the first 14 days
- Avoid vigorous exercise hot saunas, spas, solarium for the first month.

Following these steps will help ensure longevity of your brow work.

Please be aware the colour and initial look after your procedure will be dark as the pigment oxidises when working and leaves you with a dramatic look however after the first week it will settle and within 2 to 3 weeks you will be left with a very natural hair stroke similar to that of your normal brow hairs.

To maintain a very dramatic look re dos are advised.
