

# The importance of choosing the right product

## CLIMATE ZONES ADVERSE

Sea and mountains. Snow and burning sun. Constructions located in an extreme weather condition is recommended to use tiles with low water absorption and high frost resistance.

## REHABILITATION

Moisture problems, cracks, and damage over time needs to be recovered to the perfect condition. It is advisable to use products with high flexural strength to facilitate the work of installation and assembly

## CONSTRUCTION VANGUARD

Presented in the most significant construct and higher quality, Lohas roof tiles is the revolution in Australian roof tiles market. For design and aesthetical appeal it is advisable to use dimensional symmetry products

## TRADITIONAL BUILDINGS

The construction of traditional architecture needs to have highly durable products with quick and easy installation as it stays for generations.
