A LITTLE BIT ABOUT OUR PRINTING MACHINE:

Our printing machine utilises a newly developed technology. It uses an environmentally soy based ink that is safe, renewable and a sustainable resource.

Better for the environment, better for our future, better for our children.

Did you know that our printing machine uses 95% less electricity than laser copiers? That means less CO2 emissions going into our atmosphere.

Our machine doesn't generate any harmful vapours, microscopic toner particles or VOC's, making it a better healthier working environment.

If you want to do more for the environment, then it's a step in the right direction when you call on us to use our services in printing and direct mail.
